## Olympics: Russia banned from Pyeongchang Games - IOC

Karolos Grohmann

LAUSANNE, Switzerland (Reuters) - Russia has been banned from the 2018 Pyeongchang Winter Olympics after evidence emerged of widespread doping but some of its athletes will be allowed to compete under the tag of "Olympic Athlete of Russia", the IOC said on Tuesday.  
The International Olympic Committee also decided to suspend Russian Olympic Committee (ROC) president Alexander Zhukov as an IOC member given that his membership is linked to his position as chief of the ROC who have been suspended from the Games.  
Russian Deputy Prime Minister

Vitaly Mutko was also banned from any future participation at the Olympic Games.  
The IOC told a news conference that the Schmid report confirmed "the systematic manipulation of the anti-doping rules and system in Russia."  
Samuel Schmid, author of the report, told journalists: "The results are not based only on (whistleblower) Grigory Rodchenkov's testimony. There is scientific evidence, witness statements documents and correspondence."  
"The facts are that in Russia there was systemic manipulation of doping and the anti-doping system ... that also took place at Sochi 2014 (Winter Olympics)."  
The IOC's decision comes 18

months after it had refused an outright ban of Russian athletes at the 2016 Rio de Janeiro Olympics and told international sports federations to decide individually on the participation of Russians in Brazil.

### In China gas push, one-size doesn't fit all as CNOOC hires tankers

A newly installed gas meter is seen at a house in Xiaozhangwan village at the outskirts of Beijing

BEIJING (Reuters) - Local authorities in China should not use a one-size-fits-all approach to implement the country's push to heat millions of homes with natural gas this winter, the official English language paper China Daily said in an editorial on Tuesday.  
The comment came as state-owned producer CNOOC said it has leased two tankers off the coast where it is storing an emergency stash of liquefied natural gas (LNG), in an unprecedented, costly step to avoid a heating crisis.  
The China Daily opinion and the tankers are the strongest signs yet that Beijing is increasingly worried,

just two weeks into the winter heating season, about the unintended consequences of its experiment to convert the northern part of the country to cleaner burning natural gas from coal.  
China made the switch to help clear the smog that blankets the north during the winter and is caused by emissions from home heating systems as well as power plants fired by coal, the country's primary fuel source.  
Domestic LNG prices have soared over the past month, hitting record highs this week, as 28 cities have turned on their heating systems and factories have converted to the fuel for the first time.

### Deutsche Bank gets subpoena from Mueller on Trump accounts

FRANKFURT/WASHINGTON (Reuters) - A U.S. federal investigator probing alleged Russian interference in the 2016 U.S. presidential election asked Deutsche Bank (DBKGn.DE) for data on accounts held by President Donald Trump and his family, a person close to the matter said on Tuesday.  
Germany's largest bank received a subpoena from Special Counsel Robert Mueller several weeks ago to provide information

for real estate ventures and is one of the few major lenders that has given large amounts of credit to Trump in the past decade. A string of bankruptcies at his hotel and casino businesses during the 1990s made most of Wall Street wary of extending him credit.  
Mueller is investigating alleged Russian attempts to influence the election, and potential collusion by Trump aides. Russia has denied U.S. intelligence agencies' conclusion that it

on certain money and credit transactions, the person said, without giving details, adding that key documents had been handed over in the meantime.  
Deutsche Bank has lent the Trump Organization hundreds of millions of dollars

meddled in the election and Trump has said there was no collusion with Moscow.  
A U.S. official with knowledge of Mueller's probe said one reason for the subpoenas was to find out whether Deutsche Bank may have sold some of Trump's mortgage or other loans to Russian state development bank VEB or other Russian banks that now are under U.S. and European Union sanctions.  
Holding such debt, particularly if some of it was or is coming due, could potentially give Russian banks some leverage over Trump, especially if they are state-owned, said a second U.S. official familiar with Russian intelligence methods.

The US and South Korea are preparing for an all-out conflict.

Republican Senator Lindsey Graham has warned that the rising tensions between the the US and Kim Jong-un's corrupt regime means preparations for war need to be taken.

U.S. Senator Lindsey Graham

The member of the Senate Armed Services Committee warned the US was "running out of time" to prepare itself for war when speaking on CBS yesterday.

"We're getting close to a military conflict because North Korea is marching toward marrying up the technology of an ICBM with a nuclear weapon on top that can not only get to America, but deliver the weapon."

Underground bunkers are now being sold in Seoul, South Korea.

Fears of war between the two countries hit a new high last week after the rogue state announced they had successfully tested a missile capable of targeting any part of the US equipped with a nuclear weapon.

The launch ended over 60 days of silence from North Korea's missile program after regular missile tests paused in September. According to South Korea's military, the latest missile flew some 596 miles (960km) to an altitude of around 2,796 miles (4,500km).

Following the launch Hawaii began immediate test to prepare for a nuclear strike. Authorities on the island began to test a wailing siren, which represents an emergency, for a minute on Friday.

Senator Graham: Time to move American dependents out of South Korea

Graham said: "I want the Pentagon to stop sending dependents and I think it's now time to start moving American dependents out of South Korea."

Hawaii's Emergency Management Agency administrator Vern Miyagi said: "Hawaii is a likely target because we're closer to North Korea than most of the continental United States..."

"As we track the news and see tests, both missile launches, and nuclear tests, it's the elephant in the room."

Mr. Graham's calls for families to be evacuated from South Korea comes after White House national security adviser HR McMaster warned on Saturday that the issue of North Korea was close to reaching a climax.

Speaking at the Reagan National Defense Forum in California he said: "I think it's increasing every day, which means that we are in a race, really, we are in a race to be able to solve this problem."

Donald Trump has previously hinted that he is willing to use military methods to solve the North Korean nuclear problem. Addressing the UN in September he referred to Kim Jong-un as "rocket man on a mission" and has said that seeking a diplomatic solution is a "waste of time".

Addressing South Korea's National Assembly in October the US President also said America would "not be intimidated" by Kim Jong-un's rhetoric.

He warned in his speech that he had the "three largest aircraft carriers in the world are appropriately positioned" to face Pyongyang. (Courtesy https://www.express.co.uk/news/world)

Could A Video Game Be The Next Big Breakthrough In Treating Kids With ADHD?

Compiled And Edited By John T. Robbins, Southern Daily Editor

Akili Interactive Labs reported this week that its late-stage study of a video game designed to treat kids with ADHD met its primary goal, a big step in the Boston company's quest to get approval for what it hopes will be the first prescription video game.

In a study of 348 children between the ages of 8 and 12 diagnosed with ADHD, those who played Akili's action-packed game on a tablet over four weeks saw statistically significant improvements on metrics of attention and inhibitory control, compared to children who were given a different action-driven video game designed as a placebo.

"We are directly targeting the key neurological pathways that control attention and impulsivity," said Akili CEO Eddie Martucci. The study "was meant to be a strong objective test to ask: Is it the targeting we do in the brain or is it general engagement with a treatment that's exciting and interesting ... that actually leads to these targeted effects? And so I think we clearly see that it's the targeted algorithms that we have."

Despite the positive results, questions about the product remain. For instance, parents and physicians subjectively perceived about the same amount of improvement in children's behavior whether they were playing the placebo game or the therapeutic game.

The video game has not been tested head-to-head against ADHD medications or psychotherapy to see if it's equally effective.

Akili's video game, which is played on a tablet, sends players down a molten lava river and through an icy winter wonderland, rewarding them with stars and points as they complete tasks. Akili sees the video game as the delivery system for targeted algorithms that act as a medical device to activate certain neural networks.

their glucose levels. "We have something that looks and feels and is delivered through a video game," Martucci said, "but when someone's using it, they're getting a direct physiological activation that will lead hopefully — and we have a nice glimpse of data now — to cognitive and general clinical improvement."

The researchers recommended that kids complete a 30-minute session of the game five days a week for four weeks. Just 11 of the participants reported adverse events, mainly headache and frustration — much milder than the usual side effects associated with the drugs often used to treat ADHD.

Akili CEO Eddie Martucci (right) talks about one of the company's video games with Jeff Bower, Akili's director of data science.

Akili is also studying whether a similar version of its video game may have promise in treating adults with depression; the company recently started a mid-stage clinical trial in that population, with early results expected late next year.

Akili is pioneering a new class of therapy at a time when the FDA is expanding its view of what can be considered a treatment, opening the doors to all sorts of new products.

In September, the FDA approved the first mobile app to claim clinical benefit in help-

ing patients manage certain substance use disorders, developed by the Boston company Pear Therapeutics.

Then, last month, the FDA approved the first pill that can alert your doctor when you swallow it. It's a version of the schizophrenia drug sold as Abilify, embedded with sensor, and was developed in collaboration by the Japanese drug maker Otsuka Pharmaceutical and the Silicon Valley company Proteus Digital Health.

Studies also suggest that a video game might prove to be useful as an Alzheimer's screening tool. (Courtesy <https://www.statnews.com>)

Video Games for Brain Health

While the effectiveness of brain fitness games is heavily debated among researchers, one neuroscientist may have invented a video game with real staying power and results.

His game, on its journey through FDA approval, uses multitasking to improve overall brain function and he hopes that, pending FDA approval, the game could be used to help people suffering from Alzheimer's disease, PTSD, traumatic brain injuries and ADHD.

Video Games for Brain Health: A Billion Dollar Industry

Brain fitness games that promise to prolong memory, boost brain health and prevent cognitive decline are everywhere. In fact, the estimated market for these games is close to \$1 billion and experts believe the industry will grow to \$6 billion over the next five years.

However, some experts are more than skeptical about the results of these games.

Psychology professor at the Georgia Institute of Technology Randall Engle has been outspoken about his skepticism saying, "We're really talking about a biological system. The idea that you can do some little computer game for half an hour a day for 10 days and change that system is ludicrous on the face of it."

Engle has completed numerous studies putting brain fitness game to the test and has not seen any "substantial benefit" to the games. In fact, Engle was one of 75 scientists who signed a letter to the brain fitness game industry stating that marketers are inventing claims and even targeting elderly customers worried about memory loss.

New Brain Health Game Takes a Different Approach

Neuroscientist Adam Gazzaley, who in fact signed the same letter as Engle, believes that he may have invented a game that addresses both the business and science aspects of brain fitness games.

His game is in the process of getting approval from the Food and Drug Administration, which will take several years and even more money. However, if approved, the game could be used to help people suffering from Alzheimer's disease, PTSD, traumatic brain injury and ADHD.

The game is fully immersive and focuses on multitasking. For example, the player would need to guide a horse through the desert while tapping only green carrots flashing at the top of the screen, but not the radishes or carrots of another color.

Admitting that his game and his theory needs to undergo extensive testing, Gazzaley is cautiously optimistic.

While the city collectively braces for rain and 40-degree temperatures Wednesday, some Houstonians ques-

tion whether snow may be on the menu this month. Temperatures are expected to drop roughly 20 degrees Tuesday night as a cold front moves into the area, Dan

Reilly, meteorologist with the National Weather Service Houston/Galveston, said in a news release Tuesday morning. "Temperatures will stay mainly in the 40s on Wednesday (upper 40s, lower 50s near the water) with wind chills in the 30s and lower 40s. It will be windy over the marine areas and areas downwind of the Bays," Reilly added.

2018平昌冬奧會冰壺項目落選賽當地時間5日在捷克的比爾森市拉開戰幕。在未來6天時間裡,包括中國男、女冰壺隊在內的共9個國家和地區的15支隊伍將爭奪平昌冬奧會男、女冰壺項目的最後兩張入場券。

吸引華人觀眾 平昌冬奧推中國日

第23屆冬季奧運會將於2018年2月9日至2月24日在韓國平昌舉行。由於賽期橫跨中國農曆新年,為了吸引中國遊客,組委會決定將明年2月16日(農曆大年初一)定為中國日。平昌冬奧組委會國際媒體關係部主任盧煥熙日前表示:“在春節的大年初一當天,我們將專門舉行‘中國日’的主題活動,所以非常歡迎和期待中國遊客的到來。”

表團及中國遊客的情況下,這次韓國冬奧會恐怕要血本無歸。

故為了吸引更多的中國遊客前赴觀看冬奧會,韓國法務部11月30日宣佈,將從1月1日起至明年3月底,向符合一定條件的中國公民提供免簽證入境15天的優惠。

免簽證對象包括近5年內辦理韓國簽證且正常入境的中國公民、通過指定旅行社持冬奧會門票入境的中國公民、持公務普通護照的中國公民。

冰壺奧運落選賽是國際冰壺聯合會推出的一項新賽事,首屆冰壺奧運落選賽於2013年在德國舉行,中國女隊正是在那次落選賽上拿到了通往2014年索契冬奧會的門票。本屆落選賽參賽的隊員包括中國、捷克、丹麥、芬蘭、德國、意大利、荷蘭、俄羅斯、女隊包括中國、捷克、丹麥、芬蘭、德國、意大利和拉脫維亞隊。

地。目前中國女隊世界排名第十,奪得了本年度巴塞爾大師賽的冠軍。不過在落選賽之前,由於中國混雙隊拿到了冬奧會資格,因此王芮專注於混雙比賽,由麻敬宜替補入隊,因此隊伍還需要進一步磨合。

中國男隊的出戰陣容是一臧嘉亮、二臧姜東旭、三臧徐曉明和四臧劉銳。由於原來的二臧巴德鑫要同王芮一起專注混雙,因此男隊也調整了陣容。目前中國男隊狀態不錯,世界排名第七。

中國女隊在5日的首個對手將是東道主捷克隊,男隊將迎來德國隊的挑戰。單循環賽將於9日結束,前三名進入淘汰賽階段。

在淘汰賽階段,首輪第一名將與第二名展開較量,勝者獲得冬奧會資格,負者將與第三名再進行一場生死戰,獲勝的球隊將拿到最後一張冬奧會入場券。第23屆冬季奧林匹克運動會,將於2018年2月9日至2月24日在韓國平昌舉行。

值得一提的是,中國隊奪得2009年世錦賽冠軍的地方正是2018年冬奧會的比賽場地。

2016賽季虧損近40億元

中國足協財務風險防範國際研討會5日在北京舉行,中國足協財務諮詢顧問商華永道在研討會上公佈了2016賽季中超俱樂部部分收支情況:2016賽季中超俱樂部總收入為70.82億元(人民幣,下同),

而俱樂部總成本為110.14億元,虧損近40億元。其中,收入最高的俱樂部是收入最低俱樂部的50倍,成本消耗最大的俱樂部則是成本消耗最小俱樂部的38倍。從俱樂部收入比例來看,中超俱樂部商業贊助佔64%,為最大比重,賽季收入14%,球員交易11%,門票比重則只有3%。

與2015賽季對比,2016賽

季俱樂部平均成本為6.88億元,是2015賽季3.87億元的近一倍,平均人工成本(教練、球員、工作人員)也由2015賽季的2.16億元提高到4.64億元。但是,青訓成本雖然增到68%,但總標準較低,2016賽季俱樂部在青訓方面的投入只有0.32億元,2015賽季則為0.19億元。

轉會方面,2016賽季中超俱樂部轉會總支出中的78%用於購買外援,22%用於運作本土球員;收入方面,出售國內球員佔到了總轉會費收入的81%,外援僅佔19%。

總成本費用中,人工成本消耗最大,佔67%,球員資產攤銷18%,青訓投入則只有5%。

通過這組數據不難發現,當前中國職業俱樂部存在俱樂部投資者結構相對單一、職業俱樂部的商業開發處於早期階段,普遍虧損、人工成本佔比較高,青訓支出還有較大上升空間等問題。

傳PSG翼鋒盧卡斯簽國安

香港文匯報訊(記者 郭正謙)中國足球在不久的將來可能再有大牌球星加盟,有消息指中超球隊北京國安已成功與巴黎聖日耳門(PSG)的巴西翼鋒盧卡斯洛迪古斯簽約,球會方面將會很快正式對外公佈。

巴黎聖日耳門今季羅致了尼馬及麥巴比兩大星級前鋒,令25歲的巴西翼鋒盧卡斯洛迪古斯上陣時間大減。據知矢志在2018賽季有所作為的北京國安在上季尾已經開始與巴黎展開談判,5日更有消息傳出國安已成功與巴黎及盧卡斯達成協議,來季這位巴西國腳將會於中超亮相。

如果消息屬實,以速度及突破見稱的盧卡斯毫無疑問是國安迄今最重磅的收購,他將與同鄉奧古斯圖組成“森巴雙煞”挑戰中超列強;另外北京國安還在與一位名氣不亞於盧卡斯的世界級前鋒接洽當中,隨着國安加大投入力度,相信來季中超競爭將更趨激烈。

(本報記者黃梅子) 隸屬於休斯頓國際電影節全景中國的全景中國綜合藝術學院將於12月9日下午5:30舉行開學儀式Grand Opening, 這標誌著全景中國正式踏上了產業化之路。

全景中國是休斯頓國際電影節的中國主題單元, 是連接中國和美國電影界的交流平台, 開辦僅三年, 就吸引了楊冪、陸川、孫海英呂麗萍夫婦等大批中國一線影視大咖來參加休斯頓電影節, 並因為他們的名人效應使得更多的國人關注休斯頓這個昔日的文化沙漠。全景中國的創始人兼主席蔣銳並不滿足於僅僅局限於電影節, 他本身是畫家, 現在從事的又是電影事業, 他的理想是實現電影節的產業化, 讓藝術共榮。他邀請女畫家線曉媛博士加

盟全景中國團隊, 擔任全景中國綜合藝術學院的院長, 因為他很認可線博士的教育理念。線博士大學畢業於中國的中央美術學院, 還在中國、德國、丹麥和美國取得三個碩士學位, 目前是休斯頓大學教育學院藝術教育的在讀博士, 並擔任教育系的助教。她在世界各地邊留學邊畫畫, 博採東西方眾家之長, 如今又把畫畫與電影結合起來, 給全景中國綜合藝術學院注入獨一無二的藝術理念。線博士提出, 為每一位熱愛藝術的小朋友提供最具創意的藝術教育課程。主要教學理念和目的是鼓勵和培養孩子們將其它科目的知識(例如: 音樂, 科學, 數學和文學)融入到藝術學習和創作的過程中, 在創造力和想像力的空間中自由翱翔。這種理念不同於單一的繪畫課程, 而是將各種藝術門類綜合在一起, 鼓勵孩子們張開想像的翅膀, 聽從自己內心的呼喚, 做獨一無二的自己。

全景中國綜合藝術學院擁有最新和最舒適的藝術教育環境, 為每一個孩子提供藝術圖書館和藝術畫廊。第一期開設兩個年齡段的班級, 分別是從6歲到8歲和9歲以上的孩子們, 充分考慮到不同年齡段孩子的不同特點

## 請客吃飯, 不如請客流汗

# Kings Spa 大型紅外線桑拿房介紹

(本報記者施雪妮) “請客吃飯, 不如請客流汗”。三、五好友週末或節假日相聚, 一邊聊天, 一邊Spa, 是一個非常時尚的選擇。Kings Spa 是目前休士頓獨一無二、服務品種最齊全的豪華高檔休閒養生會所, 其中的大型紅外線桑拿房受到客戶的鐘愛。

紅外線是在所有太陽光中最能夠深入皮膚和皮下組織的一種射線。由於紅外線與人體內細胞分子的振動頻率接近, 便會引起人體細胞的原子和分子的共振, 透過共鳴吸收, 分子之間摩擦形成熱反應, 促使皮下深層溫度上升, 並使微血管擴張, 加速血液循環, 有利於清除血管囤積物及體內有害物質, 將妨害新陳代謝的障礙清除, 重新使組織復活, 促進酵素生成, 達到活化組織細胞、防止老化、強化免疫系統的目的。所以紅外線對於血液循環和微循環障礙引起的多種疾病均具有改善和防治作用。此外, 對人體內的一些有害物質, 例如食品中的重金屬和其它有毒物質、乳酸、游離脂肪酸、脂肪和皮下脂肪、鈉離子、尿酸、積存在毛孔中化妝品殘餘物等, 也能藉助代謝的方式, 不必透過腎臟, 直接從皮膚和汗水一起排出, 可避免增加腎臟的負擔。

紅外線和家用電器所放射出的低頻電磁波不同, 紅外線在人體皮膚的穿透力僅有0.01至0.1厘米, 人體本身也會放出波長約9微米的遠紅外線, 紅外線被用在許多疾病的輔助治療上, 例如筋骨肌肉酸痛、肌腱炎、褥瘡、燙傷及傷口不易癒合等疾病, 都

可以利用紅外線促進血液循環的特性, 而達到輔助治療的目的。對人體的益處:

1. 促進血液循環: 利用紅外線反應, 使皮下深層皮膚溫度上升, 擴張微血管, 促進血液循環, 復活酵素, 強化血液及細胞組織代謝, 對細胞恢復年輕有很大的幫助並能改善貧血。
2. 調節血壓: 高血壓及動脈硬化一般是神經系統、內分泌系統, 腎臟等細小動脈收縮及狹窄所造成。紅外線擴張微血管, 促進血液循環能使高血壓降低, 又能改善低血壓症狀。
3. 改善關節疼痛: 紅外線深透力可達肌肉關節深處, 使身體內部溫暖, 放鬆肌肉, 帶動微血管氣血及養分交換, 排除積存體內的疲勞物質和乳酸等老化廢物對消除內腫, 緩和酸痛。
4. 調節自律神經: 自律神經主要是調節內臟功能, 人長期處在焦慮狀態, 自律神經系統持續緊張, 會導致免疫力降低, 頭痛, 目眩, 失眠乏力

, 四肢冰冷。紅外線可調節自律神經保持在最佳狀態, 以上症狀均可改善或祛除。

5. 護膚美容: 紅外線照射人體產生共鳴吸收, 能將引起疲勞及老化的物質, 如乳酸、游離脂肪酸、膽固醇、多餘的皮下脂肪等, 藉毛囊口和皮下脂肪的活化性, 不經腎臟, 直接從皮膚代謝。因此, 能使肌膚光滑柔嫩。
6. 減少脂肪: 紅外線的理療效果能使體內熱能提高, 細胞活化, 因此促進脂肪組織代謝, 燃燒分解, 將多餘脂肪消耗掉, 進而有效減肥。
7. 改善循環系統: 紅外線照射的全面性和深透性, 對於遍布全身內外無以數計的微循環組織系統, 是唯一能完全照顧的理療方式。微循環順暢

之後, 心臟收縮壓力減輕, 氧氣和養分供應充足, 自然身體體健。

8. 強化肝臟功能: 肝臟是體內最大的化學工廠, 是血液的淨化器。紅外線照射引起的體內熱深層效應, 能活化細胞, 提高組織再生能力, 促進細胞生長, 強化肝臟功能, 提高肝臟解毒、排毒作用, 使內臟環境保持良好狀態, 可說是最佳的防病戰略。
