Amazon shortlists 20 cities, including Toronto, for second headquarters

(Reuters) - Amazon.com Inc (AMZN.O) has short-listed 20 cities and regions, including Canada's Toronto, for the construction of a second headquarters that it says will generate 50,000 new, high-paying jobs in a \$5 billion investment.

Major U.S. centers including New York City, Los Angeles, Chicago and Washington D.C. also made it onto the list announced on Thursday, and smaller cities such as Raleigh, North Carolina, and Columbus, Ohio. Toronto is the lone non-U.S. location.

The Seattle-based e-commerce giant's search for a location for a second North American headquarters set off a frenzy among city officials jostling for the economic boost such a project represents, with some of the 238 initial bidders promising billions of dollars in tax breaks.

Amazon said on Thursday it expects to make a decision this year.

Including Toronto in the shortlist means Amazon must now weigh whether Canada's advantages - a more open immigration policy focused on luring top global tech talent, and universal healthcare - outweigh potential blowback from U.S. President Donald Trump, who has leaned heavily on U.S. companies to invest more domestically.

"There could be consequences politically for making a decision to invest outside of the U.S.," said Shauna Brail, director of the urban studies program at the University of Toronto. "The question is how will a company the size of Amazon respond to that kind of a threat."

In November, Amazon said it would open a second corporate office in Vancouver, across the border from Seattle, in an announcement unrelated to the second headquarter search.

Toronto's bid shied away from financial incentives, while New Jersey proposed \$7 billion in potential credits against state and city taxes if the company chooses Newark and sticks to hiring commitments. The Atlanta suburb of Stonecrest has offered 345 acres of industrial land to create a new city called Amazon and to make Chief Executive Jeff Bezos its mayor for life.

The shortlist news follows Apple's announcement on Wednesday that it would build a new U.S. campus and create 20,000 new jobs as part of a \$30 billion investment, with both underlining the growing power of U.S. technology companies over the economy. Other locations on the Amazon shortlist were Atlanta, Austin, Boston, Dallas, Denver, Indianapolis, Miami, Montgomery County in Maryland, Nashville, Newark, Northern Virginia, Philadelphia, and Pittsburgh.

Will Boeing's Secret Plane 'Change The Future Air Power?'

Compiled And Edited By John T. Robbins, Southern Daily Editor

Boeing has unveiled its 'secret' plane - a new high-tech refuelling drone - following a cryptic build-up to its big reveal last month.

The drones, operated remotely, would be ejected from war ships in the same manner as these fighter jets, the aim being for them to deliver the jets with 15,000 pounds of fuel, 500 nautical miles from the carrier.

The Navy is accepting proposals from competing manufacturers until January 3 - with Boeing insisting that its design is "best suited".

The drone been equipped with refueling capabilities that would help expand the combat range of the US Navy's existing fighter jets, which include Boeing's F/A-18 Super Hornet and EA-18G Growler.

The new plane is completing its engine tests on the ground and will be ready for flight testing and deck handling demonstrations early next year, the company states. It has yet to confirm a date for the drone's first flight test.

Boeing's Phantom Swift: The design leverages two large fans buried in the aircraft's fuselage to provide vertical lift and a pair of swiveling wingtip fans for stability and control during hover and for propulsion during forward flight.

"Boeing has been delivering carrier aircraft to the Navy for almost 90 years," Don 'BD'

Gaddis, a retired admiral who leads the refueling system program for Phantom Works, said in a statement.

"Our expertise gives us confidence in our approach", the company added.

Earlier this year Boeing bought Aurora Flight Sciences Corp, which is developing the autonomous, electric-powered and long-flight-duration aircraft for its commercial and military businesses.

Last year, Aurora won a contract for more than \$89 million for the vertical take off and landing X-plane, beating Boeing in the process.

Aurora has designed, produced and flown more than 30 unmanned air vehicles since its inception and has collaborated with Boeing on the rapid prototyping of innovative aircraft and structural assemblies for both military and commercial applications during the last decade.

The radical design combines fixed-wing technology from planes with rotary-wing technology from helicopters.

It has two large rear wings and two smaller front canards, short wings mounted near the nose of the aircraft.

BOEING'S SECRET PLANE

The mysterious X-37b spaceplane has captured the imagination of many, with some

suggesting it is a spy plane and others who think it could be a space bomber.

But now its big brother is one step closer to

being built.

The project, known as XS-1, is expected to debut in 2020, and military bosses claim it will 'bolster national security by providing short-notice, low-cost access to space.'

bit of interest' in a laser-armed version of the drone, particularly for use in Marine Corps missions.

Aurora Flight Sciences said the subscale version proved the radical theory behind the craft.

The subscale aircraft weighs 325 pounds and is a 20% scale flight model of the full scale demonstrator Aurora will build for Darpa in the next 24 months.

Boeing, meanwhile, was developing its own VTOL, known as Phantom swift - and the new craft could be a hybrid of them both.

BOEING'S PHANTOM SWIFT

Boeing's Phantom Swift was a Boeing Phantom Works program that was being developed for the Defense Advanced Research Projects Agency (DARPA) under the VTOL X-Plane competition - but was ultimately beaten by Aurora's entry.

The design leverages two large fans buried in the aircraft's fuselage to provide vertical lift and a pair of swiveling wingtip fans for stability and control during hover and for propulsion during forward flight.

The idea is to have one or two General Electric CT7-8 turbines produce power to drive all these fans electrically, although an early prototype might not include a full hybrid

electric drive system.

Boeing says this configuration is far more efficient than a normal helicopter and DARPA's original design goals included hitting speeds beyond 300 knots and carry 4,000lbs. The design leverages two large fans buried in the aircraft's fuselage to provide vertical lift

'The aerospace industry is going to be changing' and the acquisition positions Boeing strategically 'for whatever that future may be,' Boeing Chief Technology Officer Greg Hyslop said on a conference call with reporters.

The deal could face regulatory obstacles, but the company hopes to complete the purchase this year, Hyslop said.

THE AURORA 'HAIRDRYER' SPECS

Aurora, the firm recently bought by Boeing,

was developing a radical 'hairdryer' VTOL that could form the basis of the new craft. Boeing's drone prototype for the US Navy's MQ-25 program.

The new aircraft can:

Achieve a top sustained flight speed of 300 knots (556 km/h) to 400 knots (741km/h).

Raise aircraft hover efficiency from 60 per cent to at least 75 per cent.

Present a 'more favourable' cruise lift-to-drag ratio of at least 10, up from 5-6.

Carry a useful load of at least 40 per cent of the vehicle's projected gross weight of 10,000-12,000 pounds (4,500-5,444kg).

Perform flight tests in 2018

Boeing's move could help Zunum Aero, a Seattle-area company aiming to bring a hybrid-electric regional airliner to market in 2022. Boeing and JetBlue Airways Corp have both made venture capital investments in Zunum.

Boeing will maintain Manassas, Virginia-based Aurora as a separate unit reporting through Boeing's engineering, test and technology division, which is headed by Hyslop. (Courtesy http://www.telegraph.co.uk and mail.google.com)

Everybody in the U.S. seems to have come down with a nasty case of the flu, and Texas is partly to blame. The Center for Disease Control's influenza activity map shows how Louisiana and Mississippi are patient zero, quickly spreading the flu to other states in the south and eventually Texas. After reaching the Lone Star State in early December, the virus makes its way to Oklahoma, Arkansas and New Mexico. Sorry neighbors. By January, the majority of the U.S. is battling moderate to high levels of flu activity.

2017-18 Influenza Season Week 41 ending Oct. 14, 2017

Fast Forward to January 2018

2017-18 Influenza Season Week 1 ending Jan. 6, 2018

Dan Jernigan, director of the influenza division at the National Center for Immunization and Respiratory Diseases, recently told reporters in a press briefing that "this is the first year we have had the entire continental U.S. be the same color on the graph, meaning there is widespread activity in all of the continental U.S. at this point." This year's flu outbreak is the most widespread since public health authorities began keeping track more than a dozen years ago, according to the influenza expert. Part of the reason is the strain of flu, H3N2, which is difficult to prevent with a shot. "We are always expecting there to be an unusual season," Jernigan said. "We are rather humbled by this virus. We are always preparing for a severe season and welcome a less severe season, but it's difficult to predict what will happen." (Courtesy <http://www.chron.com/news>)

UBS predicts lower oil prices in course of 2018

Oil prices could sink later this year as U.S. oil production climbs in response to \$60-a-barrel oil, pushing global output higher than demand, Swiss bank UBS said in a recent report.

《老男孩》曝照 劉燁林依晨共乘單車粉紅無限

由劉俊傑導，劉燁、林依晨、雷佳音、胡先煦等擔綱主演的《老男孩》，近日公布了“知愛”版人物劇照，進壹步激發了網友對於該劇的期待，想看“最萌身高差同框”、“大頭界的兩位扛把子對戲”的呼聲與日俱增。目前，該劇仍在有條不紊的拍攝中，《老男孩》定會不負眾望，為觀眾呈現壹部高品質佳作。

梁驚機長+海歸甜心 “甜”“鹹” 搭配CP感十足

此前公布的先導片、海報等影像體現了該劇精良的制作和上乘的質感，而“知愛”版人物劇照則將角色形象更加生動的呈現在了觀眾面前。其中機長吳爭（劉燁飾）身著機長制服散發出熟男魅力，與“麻辣海歸”女教

師林小歐（林依晨飾）的知性氣質相得益彰。不久前在《我的前半生》飾演“前夫哥”的雷佳音，此次化身文化商人，又會給觀眾帶來怎麼樣的驚喜呢？而胡先煦飾演的蕭哈“流浪少年”的形象令人好奇他在劇中的遭遇。另外，劇照中透露著的人物關係也同樣吸引人眼球，特別是吳爭與林小歐同乘單車的浪漫瞬間，為整部戲增添了粉紅氛圍。

折射生活回歸初心 梁驚老男孩感動成長

該劇採用“老男孩”視角描繪現實生活，將“老男孩”的成長之路緊扣真實日常。劇中既有人至不惑之年的吳爭在生活發生翻天覆地的變化後，通過職場、情感上的種種歷練實現自我蛻變的故事，也有看似事業有成但感

情上長期空窗的史非追尋真愛的過程，同時二人的兄弟情陰差陽錯的成為了雙方追愛路上最大的阻撓。內心仍有少年情懷的“老男孩”們，在仁義與愛情之中做出抉擇時的心理變化，透露著“年少不知愛，知愛不少年”的理想情懷。而該劇貫穿始終的“老男孩”生活狀態及處世態度，也折射了外表成熟實則內心拒絕“長大”的壹類都市人群心理，勢必引發濃烈的情感共鳴。梁驚老男孩人至不惑之年經歷的“愛之初體驗”將帶給觀眾最真實的感動。

電視劇《老男孩》由華策克頓旗下上海好劇影視發行有限公司、中南文化北京千易時代文化傳媒有限公司聯合出品，其紮實的劇本與新鮮的題材，將用品質和誠意為觀眾帶來壹場浪漫盛宴。

野花牌綠蜂膠

近年醫學研究發現, 從巴西綠蜂膠中提取的 Artepillin-C (阿替匹林C) 及其結構衍生物是蜂膠中對腫瘤細胞具有殺滅作用的重要活性成分。它能夠激活免疫系統, 並有直接的抗癌活性, 能夠強烈抑制肺癌、腸癌、肝癌以及喉癌細胞, 並能誘導人體白血病腫瘤細胞凋亡

科學論證抗癌性

人類肺癌細胞24小時臨床觀察
人類胃癌細胞24小時臨床觀察

日本學者 Kimoto T 等發現巴西綠蜂膠中的阿替匹林C是誘導白血病細胞凋亡的有效活性成分。他們的實驗證實綠蜂膠對7種人T細胞和5種B細胞型白血病均有誘導凋亡作用, 通過調節 Fas 基因表達是其中作用機制之一, 同時發現綠蜂膠對人正常血細胞無毒副作用。這是其同化療藥物的顯著不同之處。英國等研究發現, 綠蜂膠中提取的阿替匹林C有直接殺傷肺癌細胞作用, 抗癌效果不亞于常規的化療藥物5-氟尿嘧啶。
