Twitter Suspended 58 Million Accounts In Fourth Quarter

NEW YORK (AP) -- Twitter suspended at least 58 million user accounts in the final three months of 2017, according to data obtained by The Associated Press. The figure highlights the company's newly aggressive stance against malicious or suspicious accounts in the wake of Russian disinformation efforts during the 2016 U.S. presidential campaign.

Last week, Twitter confirmed a Washington Post report that it had suspended 70 million accounts in May and June. The cavalcade of suspensions has raised questions as to whether the crackdown could affect Twitter's user growth and whether the company should have warned investors earlier. The company has been struggling with user growth compared to rivals like Instagram and Facebook.

The number of suspended accounts originated with Twitter's "firehose," a data stream it makes available to academics, companies and others willing to pay for it. The new figure sheds light on Twitter's attempt to improve "information quality" on its service, its term for countering fake accounts, bots, disinformation and other malicious occurrences. Such activity was rampant on Twitter and other social-media networks during the 2016 campaign, much of it originating with the Internet Research Agency, a since-shuttered Russian "troll farm" implicated in election-disruption efforts by the U.S. special counsel and congressional investigations.

Suspensions surged over the fourth quarter. Twitter suspended roughly 15 million accounts last October. That number jumped by two-thirds to more than 25 million in December.

Twitter declined to comment on the data. But its executives have said that efforts to clean up the platform are a priority, while acknowledging that its crackdown has affected and may continue to affect user numbers.

Twitter said in April it had 336 million monthly active users, which it defines as accounts that have logged in at least once during the previous 30 days. The suspended accounts do not appear to have made a large dent in this number, which was up 3 percent from a year earlier. Twitter maintains that most of the suspended accounts had been dormant for at least a month, and thus weren't included in its active user numbers.

Michael Pachter, a stock analyst with Wedbush Securities, said he thinks the purge late last year may have been part of an initial sweep of inactive accounts that had little effect on activity or advertising revenue. But he said he expected advertising revenue to fall 1 to 2 percent due to the more recent purge last week, when Twitter said it was removing frozen accounts from follower counts.

He expects the company to be upfront about the impact when it announces quarterly earnings on July 27, and said the cleanup is good for users and advertisers. "They're certainly doing the right thing," he said.

Scott Kessler, an analyst with CFRA who has a "sell rating" on Twitter stock, said multiple reports and vague clarifications by executives are creating uncertainty about what Twitter's numbers really mean.

The purge activity "adds a level of uncertainty," he said. "As an analyst, I want a more genuine view of the user base."

Chief Financial Officer Ned Segal said in February that some of the company's "information quality efforts" that include removing accounts could affect monthly user figures. Segal offered no specifics.

Six months later, in late June, Twitter disclosed that its systems found nearly 10 million "potentially spammy or automated accounts per week" in the month of May, and

6.4 million per week in December 2017. That's up from 3.2 million per week in September. The company didn't say how many of these identified accounts were actually suspended.

Following the Post report, which caused Twitter's stock to drop sharply, Segal took to Twitter to reassure investors that this number didn't count in the company's user metrics. "If we removed 70M accounts from our reported metrics, you would hear directly from us," he tweeted last Monday.

Shares recovered somewhat after that tweet. The stock has largely been on an upswing lately, and more than doubled its value in the past year. Twitter is taking other steps besides account deletions to combat misuse of its service, working to rein in hate and abuse even as it tries to stay true to its roots as a bastion of free expression. Last fall, it vowed to crack down on hate speech and sexual harassment and CEO Jack Dorsey echoed the concerns of critics who said the company hasn't done enough to curb such abuse. Google, Hit With Record \$5 Billion EU Antitrust Fine, Company To Appeal

BRUSSELS (Reuters) - EU antitrust regulators hit Google with a record 4.34 billion euro (\$5 billion) fine on Wednesday for using its Android mobile operating system to squeeze out rivals, and Google said it would appeal.

The penalty is nearly double the previous record of 2.4 billion euros which the U.S. tech company was ordered to pay last year over its online shopping search service. It represents just over two weeks of revenue for Google parent Alphabet Inc. and would

scarcely dent its cash reserves of \$102.9 billion. But it could add to a brewing trade war between Brussels and Washington. EU antitrust chief Margrethe Vestager said she very much liked the United States, countering a reported remark by President Donald Trump that she "hated" the country.

"But the fact is that this has nothing to do with how I feel. Nothing whatsoever. Just as enforcing competition law, we do it in the world, but we do not do it in the political context," she said.

Google's parent company Alphabet said in a regulatory filing it would accrue the fine in the second quarter of 2018.

"We are concerned that today's decision will upset the careful balance that we have struck with Android, and that it sends a troubling signal in favour of proprietary

systems over open platforms," Google CEO Sundar Pichai said in a blog.

Vestager's boss, Commission President Jean-Claude Juncker, is due to meet Trump at the White House next Wednesday in an effort to avert threatened new tariffs on EU cars amid Trump's complaints over the U.S. trade deficit. Vestager also ordered Google to halt anti-competitive practices in contractual deals with smartphone makers and telecoms providers within 90 days or face additional penalties of up to 5 percent of parent Alphabet's average daily worldwide turnover.

"Google has used Android as a vehicle to cement the dominance of its search engine. These practices have denied rivals the chance to innovate and compete on the merits. They have denied European consumers the benefits of effective competition in the important mobile sphere," Vestager said. (Courtesy Reuters)

Houston Council Members Call Rare Special Meeting On Firefighter Pay

In a rare maneuver that sidesteps Mayor Sylvester Turner's authority, five City Council members have called a special meeting this week, hoping to force the issue of Houston firefighters' push for a referendum on pay "parity" with police.

The council members aim to secure their colleagues' support for a resolution calling on Turner to place an item on the council's July 24 agenda to schedule a November election on the petition, which seeks to grant firefighters the same pay as police officers of corresponding rank.

In Houston's strong-mayor form of government, the mayor generally has sole authority to decide what appears on the agenda for the weekly council meetings.

The lone exception allows three council members to set the agenda of a special meeting. Such gatherings — including this one — typically are organized without the mayor's approval and often struggle to muster a quorum, as many of the 16 council

Former City Attorney David Feldman, center, talks to media about the more than 32,000 signatures Houston firefighters collected in an effort to put equal pay on the ballot during a press conference outside City Hall in 2017.

members are loathe to invite the mayor's wrath.

Council members Greg Travis, Michael Kubosh, Brenda Stardig, Martha Castex-Tatum and Dwight Boykins signed a Monday memo calling a special council meeting for 10 a.m. Friday.

Council members Greg Travis, Michael Kubosh, Brenda Stardig, Martha Castex-Tatum and Dwight Boykins signed a Monday memo calling a special council meeting for 10 a.m. Friday.

Turner is on a trade mission in South America and will not be back in time to attend the meeting.

Kubosh said he signed the memo to help ensure the issue was discussed, noting that several elections have passed since the petition was submitted.

"They were successful last year at stalling it a whole year, so, yes, I think that's possible," Kubosh said, referring to the Turner administration.

Stardig said she supported the move in part because the administration had not provided a clear timeline on the matter.

"We have to protect the citizens' right to petition their government," she said. "We have an obligation to bring this forward. They were counted by

the city secretary and verified."

Marty Lancton, president of the Houston professional Fire Fighters Association, cheered the news, noting that firefighters gathered voters' signatures and submitted their petition roughly a year ago.

State law sets no time limit on when charter petitions must be validated. When their petition had not been verified as of last December, Lancton and other fire union leaders sued the city, hoping to force it to count their signatures. The firefighters won that case earlier this year, and City Secretary Anna Russell reported in May that the petition contained a sufficient number

of signatures to go before voters.

In the months since then, with an Aug. 20 deadline approaching to schedule items for the November ballot, the firefighters had grown concerned that their initiative could be thwarted again even though council is required by state law to place verified petitions before voters.

"Why is it appropriate to wait until the very end if this is simply a process under state law? This has been something the citizens of Houston have clearly said they want a say in, and it should have been on (the ballot) in November of 2017," Lancton said. "The mayor's secrecy and just utter refusal to discuss what the plans are for this ballot initiative just raise incredibly troubling questions."

Turner's chief of staff, Marvalette Hunter, told council staff in a Monday night email that the mayor had not been consulted before the council members' memo was submitted.

Hunter wrote that Turner and Councilman Dave Martin, who chairs the council's budget committee, had agreed over the weekend to schedule the issue for a committee hearing July 26 and had discussed placing the referendum item on the council's normal Aug. 8 meeting agenda. Martin confirmed that account, saying Turner emailed him as much at 9:02 a.m. Friday. (Courtesy Houston Chronicle)

美南廣播電視台 看電視聽廣播

美南新媒體 全面進入數據互聯時代

美國華人傳媒史上重大突破

美南電視 STV15.3

全球直播 LIVE

掃三維碼(QR code)：收看電視 收聽廣播 全球直播

美南電視 STV15.3 為方便觀眾收看，「電視廣播合為一體」，不需任何付費，觀眾可24小時直接收看及收聽該頻道，行車間也可方便收聽，輕鬆獲取美南電視節目以及各類國際、社區重大資訊。

美南電視 STV15.3 收看 操作指南如下，讓觀眾24小時收看收聽：

- 掃二維碼(QR code)：觀眾只要掃描報上的二維碼，就可連結到美南國際電視，直接在手機上觀看STV15.3。
- 今日美南公眾號直播：觀眾可在「今日美南」公眾號上，點選「美南電視」裡的「美南國際電視直播」，就可輕鬆連接至STV15.3。
- 下載Apps收看：可在蘋果商店搜尋「Today America」，下載Apps，除可用手機讀報更方便，也可以在Apps裡收看STV15.3 電視直播。
- Google搜尋：觀眾只要在Google網站搜尋「Southern TV - STV15.3 Houston」，或輸入該平臺網址 <http://media.maqtv.com/?1497381&proc=1> 就可直接連結美南國際電視直播平台。

如需開車時收聽廣播，請連接到車載音響設備(數據線/藍牙設備)，效果更佳。

Wall Street At Five-Month Highs, Amazon Hits \$900 Billion Market Cap

HOUSTON (June 5, 2018) – Houston-area middle and high school students showed off their entrepreneurial talents at the 2018 Inventathon sponsored by the Center for Entrepreneurship at the Houston Community College Southwest campus. The competition's 120 participants were tasked with crafting innovative solutions for saving and conserving energy. Twenty of the inventions were submitted for judging.

First place went to Saran Chockan and Vibhor Kumar from Clements High School for their "SkyPrint" tool, which saves paper by eliminating unnecessary ads and white space when printing online articles and content.

Second-place winners are Raymond Nguyen, Varun Dixit, and Bill Rolph from Memorial High School who created and built a system that replaces regular bicycle brakes with a regenerative braking system that will allow a bike to store power and charge electronics.

The third-place winners include Jefferson Yu and Desai Sanmidhya of Elkins High School; Amogha Pokkulandra and Arjun Bhatia from Quail Valley High School; and Keshav Shah from Dulles High School. The team project was called "Energized Exhaust" and utilized a groundbreaking chemical reaction between CO₂ and Lithium Nitride to fully neutralize gasoline emissions into clean air.

Fourth place went to Manan Bhatia, Ibrahim Elsharkawy and Elyas Stephen of

BUSINESS

Supreme Court: Online Shoppers Can Be Forced To Pay Sales Tax

Compiled And Edited By John T. Robbins, Southern Daily Editor

This file photo shows the Supreme Court in Washington, DC. The Supreme Court has ruled that states can force online shoppers to pay sales tax. The 5-4 ruling Thursday is a win for states, who said they were losing out on billions of dollars annually under two decades-old Supreme Court decisions that impacted online sales tax collection. The high court ruled Thursday to overturn those decisions. (Photo/AP)

being shipped to. Amazon.com, with its network of warehouses, also collects sales tax in every state that charges it, though third party sellers who use the site to sell goods don't have to.

But sellers that only have a physical presence in a single state or a few states have been able to avoid charging customers sales tax when they shipped to addresses outside those states. Online sellers that haven't been charging sales tax on goods shipped to every state range from jewelry website Blue Nile to pet products site Chewy.com to clothing retailer L.L. Bean. Sellers who use eBay and Etsy, which provide platforms for smaller sellers, also haven't been collecting sales tax nationwide. Under the Supreme Court's decision Thursday, states can pass laws requiring

sellers without a physical presence in the state to collect the state's sales tax from customers and send it to the state.

The National Retail Federation trade group, said in a statement that the court's decision was a "major victory" but the group said federal legislation is necessary to spell out details on how sales tax collection will take place, rather than leaving it to each of the states to interpret the court's decision.

Justice Anthony Kennedy wrote that the previous decisions were flawed. "Each year the physical presence rule becomes further removed from economic reality and results in significant revenue losses to the States. These critiques underscore that the physical presence rule, both as first formulated and as applied

today, is an incorrect interpretation of the Commerce Clause," he wrote in an opinion joined by Justices Clarence Thomas, Ruth Bader Ginsburg, Samuel Alito and Neil Gorsuch.

The cases the court overturned said that if a business was shipping a product to a state where it didn't have a physical presence such as a warehouse or office, the business didn't have to collect the state's sales tax. Customers were generally supposed to pay the tax to the state themselves if they don't get charged it, but the vast majority didn't.

The cases the court overturned said that if a business was shipping a product to a state where it didn't have a physical presence such as a warehouse or office, the business didn't have to collect the state's sales tax. Customers were generally responsible for paying the sales tax to the state themselves if they weren't charged it, but most didn't realize they owed it and few paid.

In addition to being a win for states, the ruling is also a win for large retailers, who argued the physical presence rule was unfair. Large retailers including Apple, Macy's, Target and Walmart, which have brick-and-mortar stores nationwide, already generally collect sales tax from their customers who buy online. That's because they typically have a physical store in whatever state the purchase is being shipped to. Amazon.com, with its network of warehouses, also collects sales tax in every state that charges it, though third party sellers who use the site to sell goods don't have to.

But sellers that only have a physical presence in a single state or a few states have been able to avoid charging customers sales tax when they shipped to addresses outside those states. Online sellers that haven't been charging sales tax on goods shipped to every state range from jewelry website Blue Nile to pet products site Chewy.com to clothing retailer L.L. Bean. Sellers who use eBay and Etsy, which provide platforms for smaller sellers, also haven't been collecting sales tax nationwide. Under the Supreme Court's decision Thursday, states can pass laws requiring

required to collect sales tax nationwide. Chief Justice John Roberts and three of his colleagues would have kept the court's previous decisions in place. Roberts wrote that Congress, not the court, should change the rules if necessary.

"Any alteration to those rules with the potential to disrupt the development of such a critical segment of the economy should be undertaken by Congress," Roberts wrote in a dissent joined by Justices Stephen Breyer, Elena Kagan and Sonia Sotomayor.

The case the court ruled in has to do with a law passed by South Dakota in 2016. South Dakota's governor has said his state has been losing out on an estimated \$50 million a year in sales tax that doesn't get collected by out-of-state sellers. Lawmakers in the state, which has no income tax, passed a law designed to directly challenge the Supreme Court's 1992 decision. The law requires out-of-state sellers who do more than \$100,000 of business in the state or more than 200 transactions annually with state residents to collect sales tax and turn it over to the state.

South Dakota wanted out-of-state retailers to begin collecting the tax and sued several of them: Overstock.com, electronics retailer Newegg and home goods company Wayfair. The state conceded in court, however, that it could only win by persuading the Supreme Court to do away with its physical presence rule. After the decision was announced, shares in Wayfair and Overstock both fell, with Wayfair down more than 3 percent and Overstock down more than 2 percent.

The Trump administration had urged the justices to side with South Dakota.

The case is South Dakota v. Wayfair, 17-494. (Courtesy <https://mtstandard.com/news/nationalandwww.ocregister.com>)
