## Russia warns Kyiv as Ukraine's cities shelled, armed convoy

KYIV, March 1 (Reuters) - Russia warned Kyiv residents to flee their homes on Tuesday and rained rockets on the city of Kharkiv as Russian commanders intensified their bombardment of Ukrainian urban areas in a shift of tactics after their six-day assault stalled.

A U.S. official said a miles-long armoured column bearing down on the capital Kyiv had not made any advances in the past 24 hours, frozen in place by logistics problems, short on fuel and food, and perhaps pausing to reassess tactics.

Russia's defence ministry said its forces would strike targets in Kyiv used by Ukraine's security service and also communications sites. It warned residents near such sites to leave their homes, while giving no information about where in the city of three million people those targets were located.

Speaking in a heavily guarded government compound in Kyiv, President Volodymyr Zelenskiy said Russia must "first stop bombing people" before peace talks could make any headway. In a joint interview with Reuters and CNN, Zelenskiy also urged NATO members to impose a no-fly zone to stop Russia's airforce, something the military alliance has ruled out.

As Zelenskiy, unshaven and wearing simple khaki clothes, spoke, news came that a Russian missile had struck a TV tower near the Babyn Yar Holocaust memorial site in Kyiv, killing at least five people.

Rocket strikes on Ukraine's second biggest city Kharkiv killed at least 10 people and wounded 35, Ukrainian Interior Ministry adviser Anton Herashchenko said. Similar strikes killed and wounded dozens in Kharkiv on Monday. [read more](#)

Zelenskiy, who also spoke by phone for 30 minutes with U.S. President Joe Biden on Tuesday, said the artillery barrages on Kharkiv, a city of 1.5 million, amounted to "state terrorism".

In their call, Biden and Zelenskiy discussed how Russia had intensified attacks on sites used by civilians and the U.S. president underscored Washington's economic and security support and humanitarian aid to Kyiv, the White House said.

'SHAMBOLIC'

The West has imposed heavy sanctions on Russia to shut off its economy from the global financial system, pushing companies to halt sales, cut ties and dump tens of billions of dollars' worth of investments. [read more](#)

Nearly a week since Russian troops poured over the border, they have not captured a single major Ukrainian city after running into far fiercer resistance than they expected.

Michael Kofman, an expert on the Russian military at Washington DC's Wilson Center, tweeted: "Looking at the Russian operation so far, they're having tremendous problems with logistics and communications. The whole effort seems shambolic."

Many Western military analysts fear that Russia will now fall back on tactics which call for crushing bombardment of built-up areas before trying to enter them.

A U.S. official, speaking on condition of anonymity, said:

"One reason why things appear to be stalled north of Kyiv is that the Russians themselves are regrouping and rethinking and trying to adjust to the challenges that they've had."

The Russians have been surprised not only by the scale of Ukrainian resistance but also by poor morale among their own forces, some of whom surrendered without a fight, the U.S. official said.

A view shows the area near the regional administration building in Kharkiv Russia's invasion of Ukraine, in Kiev A view shows the damaged regional administration building in Kharkiv

Russia still has more forces to throw into the fight even though President Vladimir Putin has drawn global condemnation and sanctions that have already sent the rouble into freefall and forced Russians to queue outside banks for their savings.

Russia's Defence Minister Sergei Shoigu said the "special military

operation" would continue until it had achieved its goals, defined by Putin as disarming Ukraine and capturing the "neo-Nazis" he says are running the country.

In the south, Russia claimed to have completely encircled Ukraine's Azov Sea coast. If confirmed, that would mean Russian forces invading from Crimea had joined up with separatists in the east and had cut off Ukraine's main eastern port, Mariupol.

Pictures released by U.S. satellite company Maxar showed Russian tanks, artillery and fuel trucks stretching for 40 miles (60 km) along a highway to the north of Kyiv.

Zelenskiy said Kyiv remained the main target. Some Kyiv residents have been sheltering in underground metro stations at night. There are long lines for fuel and some products are running out in shops.

# WEA LEE'S GLOBAL NOTES

03/01/2022

## Why We Don't Send Troops To Ukraine

Russia invaded Ukraine over the last five days and because of the unexpected encounters and resistance of the Ukraine people, Russia did not capture the capital within their planned expectations. The Ukraine authorities claimed it had killed 3,000 Russian soldiers, destroyed more than 100 tanks and hundreds of armored vehicles and helicopters, even though both sides had

agreed on a peace negotiation. But this war already has changed the pattern of world politics.

We would like to point out in particular why the United States is unwilling to send in troops to Ukraine to resist Russia.

According to the latest polls, more than 72% of Americans are unwilling to be involved in a foreign war.

We learned from Korea, Vietnam and wars in Afghanistan and the Middle East where hundreds of thousands of Americans lost their lives.

Ukraine is not the most important country for the United States and President Biden really worries that a confrontation with Russia may trigger World War III. For those reasons, the United States and NATO

are unwilling to get directly involved in the war.

Unfortunately, politics is very realistic. No leaders are willing to make sacrifices against their core interests.

When Mr. Zelensky took over power in Ukraine in 2019, as a former TV star, he never thought that where he was headed would turn into a global disaster.

BUSINESS

How Russia’s Invasion Of Ukraine Could Impact You

Further sanctions, energy market disruptions and cyberwarfare could reach Americans seemingly far removed from the conflict between Ukraine and Russia. Here, Russian army tanks are loaded onto trains to move them back to their permanent base after drills in Russia. (Photo/ Russian Defense Ministry Press Service via AP)

Compiled And Edited By John T. Robbins, Southern Daily Editor

The long-feared invasion of Ukraine by Russia jolted markets, sent energy prices higher and prompted promises of a new round of consequences for Russia — signals that even people out of immediate harm’s way will be affected by what threatens to become the biggest war in Europe since World War II. Here’s how the invasion will have ripple effects far outside the borders of the conflict. **There could be collateral damage from sanctions on Russia** This week, President Biden announced a “first tranche” of economic sanctions on two Russian banks with about \$80 billion in assets and five Russian oligarchs and their families, and prohibited U.S. entities from purchasing Russian sovereign debt. More sanctions are expected to follow in response to what Biden said is a “needless act of aggression against Ukraine and global peace and security.”

President Biden speaks about Russia and Ukraine in the East Room of the White House on Tuesday. (Photo/Brendan Smialowski/AFP via Getty Images)

The forthcoming sanctions could include

restrictions on major Russian banks that would dramatically affect Russia’s ability to conduct international business. Severe U.S. sanctions could drive up prices for everyday Russians or cause Russia’s currency or markets to crash. Because the U.S. does not rely much on trade with Russia, it is somewhat insulated from direct consequences. Europe is more directly affected. But certain sectors of the U.S. economy rely on highly specific Russian exports, primarily raw commodities. “The premise of sanctions is to hurt the other guy more than you hurt your own interests. But that does not mean there will not be some collateral damage,” said Doug Rediker, a partner at International Capital Strategies. **Energy prices could rise** In the early hours following Russia’s invasion, Brent crude oil was trading at more than \$100 per barrel for the first time since 2014, and another benchmark, West Texas Intermediate, rose nearly 5% to more than \$96 per barrel. Russia is a major exporter of oil and natural gas, especially to Europe. As a result, officials have reportedly shied away from severe sanctions on Russian energy exports. But there are other ways the energy market could be disrupted. **Nearly 40% of the natural gas used by the European Union comes from**

**Russia. President Biden said prior to Russia’s invasion of Ukraine that the not-yet-operational Nord Stream 2 pipeline would not move ahead in the event of an invasion. (Photo/Michael Sohn/AP)** For one, Russia could choose to cut off or limit oil and gas exports to Europe as retaliation for sanctions. Nearly 40% of the natural gas used by the European Union comes from Russia — and no European country imports more than Germany, a key ally of the United States. Even if Russia chooses not to limit exports, supplies could still be affected by the conflict in Ukraine because multiple pipelines run through the country, carrying gas from Russia to Europe. “They could simply be casualties of a military invasion,” Rediker said. Either way, if Europe’s natural gas supply is pinched, that could cause energy prices — which have already been climbing — to rise even further. And even though the U.S. imports relatively little oil from Russia, oil prices are set by the global market, meaning local prices could rise anyway. “There’s a geopolitical premium, or call it a fear premium, in the price of oil,” Daniel Yergin, vice chairman of IHS Markit, told Morning Edition. “An expectation that as this crisis spirals worse, that supplies of oil from Russia are going to be disrupted.” **Other industries, from food to cars, might also be hurt** Russia is a major exporter of rare-earth minerals and heavy metals — such as titanium used in airplanes. Russia supplies about a third of the world’s palladium, a rare metal used in catalytic converters, and its price has soared in recent weeks over fears of a conflict. Ukrainian economic output and industry will likely be significantly disrupted. The country is a major source of neon, which is used in manufacturing semiconductors. As a result, U.S. officials have warned various sectors, including the semiconductor and aerospace industries, to brace for supply chain disruptions. Fertilizer is produced in major quantities in both Ukraine and Russia. Disruptions to those exports would mostly affect agriculture in Europe, but food prices around the world could rise as a result. **Global markets could drop** The invasion rattled investors Wednesday, with Dow futures down more than 2% before the markets opened in the United States. Markets across Asia also dropped. The invasion sent the prices of traditional investment safe havens higher, with gold

up more than 1.5% overnight.

“Markets are fundamentally not prepared for a land war in Europe in the 21st century,” Rediker said. “It’s something people just have not contemplated.” The U.S. stock market has already been unusually volatile in recent weeks, churning over inflation, moves by the Federal Reserve to curb its stimulus programs and the looming conflict in Ukraine. Historically, the market has bounced back relatively quickly after geopolitical events. That’s what’s most likely today too, analysts say, so the effect on people with 401(k) accounts may be short term. But if the conflict causes long-lasting disruption of energy markets and other exports, investors could rethink that conventional wisdom. “You’re potentially at a point where not only are we looking at Russia potentially invading Ukraine and sanctions and countermeasures, but you are also looking at a rise of China that doesn’t necessarily agree with the American perspective on the world anyway,” Rediker said last week, before the invasion. “Are we looking at a point in which some of the major premises that people take for granted have to be reassessed?” **Russia could launch disruptive cyberattacks** Another way Russia could respond to U.S. sanctions is through cyberattacks and influence campaigns. Various federal agencies, including the Treasury and the Department of Homeland Security, have warned of possible cyberattacks on targets like big banks and power grid operators. “They have been warning everyone about Russia’s very specific tactics about the possibility of attacks on critical infrastructure,” Katerina Sedova, a researcher at Georgetown University’s Center for Security and Emerging Technology, told NPR. Russian cyberattacks have targeted Ukraine relentlessly in recent years, including attacks on the capital city of Kyiv’s power grid in 2015 and 2016. But a major escalation could shift focus to U.S. targets. Sedova pointed to the Russian state-backed attack on the IT software company SolarWinds and a ransomware attack that shut down the Colonial Pipeline for six days as

examples of how major Russian cyberattacks could disrupt U.S. operations. (The Biden administration said it does “not believe the Russian government was involved” in the pipeline attack.) Power grids, hospitals and local governments could all be targets, she said. For now, Sedova said she is more worried about subtler attacks — like influence campaigns that aim to “sow discord between us and our allies in our resolve” to act jointly against Russia. “Oftentimes, cyber-operations go hand in hand with influence,” she said. “They’re targeting a change of decision-making, a change in policy in that direction, a change in public opinion.” **A major invasion would likely spark a refugee crisis**

**A serviceman with Ukraine’s military forces walks along a trench on the front line with Russia-backed separatists, not far from Novoluhanske, in Ukraine’s Donetsk region, on Feb. 16. (Photo/Anatolii Stepanov/AFP via Getty Images)** The invasion could send 1 million to 5 million refugees fleeing Ukraine, U.S. officials and humanitarian agencies have warned. “It will be a continent-wide humanitarian disaster with millions of refugees seeking protection in neighbouring European countries,” Agnès Callamard, secretary-general of Amnesty International, said last month in statement. Poland, which shares a border with Ukraine and is already home to more than a million Ukrainians, would likely see the most refugees. Polish Interior Minister Mariusz Kaminski said his country was preparing for an “influx of refugees” from Ukraine. The U.S. military says that the thousands of soldiers deployed to Poland this month are prepared to assist with a large-scale evacuation. “Assistance with evacuation flow is something they could do, and could do quite well. They are going to be working with Polish authorities on what that looks like and how they would handle that,” Defense Department spokesperson John Kirby said last week. At the largest scale, a refugee crisis would not be contained to Europe — the U.S. would likely see refugees seeking asylum too. (Courtesy npr.org)

Will The New, Fast 5G Mobile System Put Lives At Risk?

5G Signal Could Jam Satellites That Provide Weather Forecasting

Compiled And Edited By John T. Robbins, Southern Daily Editor

Forecasters may no longer be able to warn of storms such as 2018’s ‘beast from the east’, which dumped heavy snow on cities on the East Coast of the U.S. (Photo/ Humphreys/PA)

The introduction of 5G mobile phone networks could seriously affect weather forecasters’ ability to predict major storms. That is the stark warning of meteorologists around the world, who say the next-generation wireless system now being rolled out across the globe is likely to disrupt the delicate satellite instruments they use to monitor changes in the atmosphere. The result will be impaired forecasts, poorer warnings about major storms, and loss of life, they say. “The way 5G is being introduced could seriously compromise our ability to forecast major storms,” said Tony McNally of the European Centre for Medium-Range Weather Forecasts in Reading, Pennsylvania. “In the end it could make the difference between life and death. We are very concerned about this.”

**5G boxes are being attached to street signs across America.** The crisis facing the world’s meteorologists stems from the fact that the radio frequencies the new 5G networks will use could contaminate critical Earth observations made by weather satellites. Instruments onboard the satellites peer down into the atmosphere and study variables such as water vapor, rain, snow, cloud cover and ice content — all crucial factors that influence our weather. One example is the 23.8 gigahertz (GHz) fre-

quency. Water vapor emits a faint signal at this specific natural wavelength, and this data is monitored and measured by weather satellites. Forecasters then use this information to work out how a storm or weather system is likely to develop. Such data is critical to our ability to make forecasts,” said Niels Bormann, also of the Reading weather centre. “They are a unique natural resource, and if we lose this capability, weather forecasts will get significantly worse.”

**A 5G box attached to a pole on the Las Vegas Strip, just one block from Caesar’s Palace.** The problem is that some 5G phone networks may transmit near a frequency similar to that emitted by water vapor, and so would produce a signal that looks very like the presence of water vapor in the atmosphere. “We would not be able to tell the difference and so would have to discard that data,” added Bormann. “That would seriously compromise our ability to make accurate forecasts.” The urgency of the problem is underlined by the fact that US Federal Communications Commission and similar agencies in other countries have already started to auction off frequencies close to the 23.8 GHz frequency to future 5G network providers. In addition, other bands that are used to probe our weather include the 36-37 GHz band, which is used to study rain and snow; the 50 GHz band, which is used to measure atmospheric temperature; and the 86-92 GHz band, which helps to analyze cloud and ice.

**A 5G box high on a pole near Boston’s Fenway Park.** All these contain sections of waveband that are being auctioned off in the US. It remains to be

seen if other nations will follow suit and sell these frequencies in their own countries over coming months. The issue is set to be debated at a global conference in Egypt later this year. Forecasters say the US move has already compromised their ability to collect data, and promise to lobby other nations to limit use of crucial frequencies to preserve their ability to provide accurate forecasts. They accuse phone operators of ransacking the radio spectrum for wavelengths to exploit, and regulators of failing to protect the natural frequencies vital for Earth observation from space. “The more we lose, the greater the impact will be,” states meteorologist Jordan Gerth of the University of Wisconsin-Madison, in the current issue of Nature. “This is a global problem.” (Courtesy https://www.theguardian.com)

Related 5G Health Effects: Dangers Of New Wireless Technology

5G, the next-generation mobile wireless technology, will create the always-on, always-connected wireless world long-sought by the wide-eyed champions of this technology. It will infuse billions of connected devices, which will ceaselessly emit and receive wireless signals as they work to satisfy users all around the world. The electromagnetic radiation from the hundreds of billions of 5G-connected devices will bombard the entire planet and most every human on it every second of every day. And herein lies the problem, say critics of 5G concerned about the health hazards of this new technology. 5G is a health risk, they contend, and a mounting number of studies seem to prove this point. This new tech took its biggest leap forward in April when South Korea proudly boasted to the world that it had become the first country to deploy a nationwide 5G network. Samsung then revealed the world’s first 5G mobilephone, the Samsung Galaxy S10 5G.

The United States plans to roll out nationwide 5G networks over the next few years. China wants to beat the U.S. to this landmark while the 27 countries in the European Union will deploy the tech by the next decade. 5G will be everywhere by the 2020s, and so will be its health dangers. For a start, getting 5G to become ubiquitous will mean building new cell towers, millions and millions of them. These towers bring with them all the health risks associated with overexposure to electromagnetic radiation.

The preliminary results of a the \$25 million National Toxicology Program study released in 2016 found a link between cell phone radiation and cancer. It also found an increased risk of radiation exposure beyond what’s deemed safe by the U.S. government. Critics of 5G and its health dangers admit a lot of research needs to be done before they can definitely say cell phone radiation causes cancer. But the question they pose is: “Should humans be guinea pigs in the meantime?”

**A 5G box attached to a lamp pole at the corner of East 57th Street, close to Times Square in New York City.**

“I don’t think it’s clear that there are health risks, but it’s also not clear that there are no health risks,” said Dr Leeka Kheifets, PhD, an epidemiology professor at UCLA. According to a 2018 study published in the journal Health Physics, extremely fast bursts of data transfers on a device as the result of 5G technology might lead to the heating of skin tissue in exposed people under current safety guidelines. (Courtesy https://www.medicaldaily.com) **Is the 5G spectrum harmful to our health? Experts say, ‘Don’t worry.’** Harnessing millimeter wave (mmWave) spectrum for faster data speeds is one of the biggest breakthroughs of 5G, the next generation cellular networking technology following 4G LTE. But there are concerns this very high-frequency spectrum could pose adverse health effects for the public.

**Is RF radiation safe?** The radiation that cellphones give off is at the low-energy end of the electromagnetic spectrum, making them much safer than high-energy radiation like x-rays and gamma rays. While the latter give off ionizing radiation, meaning they have enough energy to ionize an atom or molecule and thus damage cell DNA resulting in cancer, RF radiation does not. RF radiation only has enough energy to move or vibrate atoms in a molecule, not enough to ionize it. While that means RF radiation does not cause cancer by damaging DNA cells, there still are ongoing studies regarding the effects of non-ionizing radiation. The FDA noted in 2018 statements that it believes “the current safety limits for cellphone radiofrequency energy exposure remain acceptable for protecting the public health.”

**Where 5G fits in the electromagnetic spectrum** The U.S. Environmental Protection Agency (EPA) and U.S. National Toxicology Program (NTP) also have not formally classified RF radiation as cancer-causing. Meanwhile, the World Health Organization’s International Agency for Research on Cancer (IARC) classifies RF radiation as “possibly carcinogenic to humans” due to the finding of a possible link in at least one study between cellphone use and a specific type of brain tumor. However, the IARC considers overall evidence “limited.” It’s also important to note the IARC puts coffee and talc-based body powder in the same “possibly carcinogenic” category. In one of the most recent studies, performed by the National Toxicology Program (NTP), high exposure to 2G and 3G RF radiation led to cancerous heart tumor development in male rats. NTP senior scientist John Butcher noted, however, that the levels and duration of exposure to RF radiation were much greater than what people experience with even the highest level of cell phone use, so the findings should not be directly extrapolated to human cell phone usage. Additionally, Butcher warned that 5G likely differs dramatically from 2G and 3G, so further studies are necessary.

**What about 5G?** The FDA told Digital Trends that, at this time, it “continues to believe that the current safety limits for cellphone radiofrequency energy exposure remain acceptable for protecting the public health.” “The limits are based on the frequency of the device, meaning that 5G has a different limit than other technologies,” an agency spokesperson wrote in an email. “As part of our commitment to protecting the public health, the FDA has reviewed, and will continue to review, many sources of scientific and medical evidence related to the possibility of adverse health effects from radiofrequency energy exposure in both humans and animals and will continue to do so as new scientific data are published.” The agency noted that it lists significant ongoing research on the topic of RF exposure on its website at https://www.fda.gov/radiation-emitting-products/cell-phones/current-research-results. # 美南國際電視15.3的《JJ觀點》 俄烏戰爭會不會引發第三次世界大戰？

（本報記者黃梅子）隨著2月28日俄烏首輪談判宣告破裂，目前俄烏戰爭繼續激烈進行。俄烏戰爭會不會引發第三次世界大戰？大多數人認為不會，不過第一次世界大戰的時候大家也特別樂觀呢，都想著小打小鬧後幾個月結束戰鬥，跟妻兒團聚呢。

現在整個烏克蘭軍隊都在跟俄羅斯對峙，也就不存在只占半個烏克蘭的設想了。要是不把烏克蘭正規軍打爛，打爛就能全占；如果真全占，與北約直接接壤，北約能接受這樣的恥辱？從西方民意來講，大多是同情烏克蘭，北約直接間接出戰烏克蘭是沒有民意阻礙的。

北約一旦下場，斷不可能只是驅逐俄羅斯，不趁機肢解俄羅斯就是大虧；而中國也斷不可能接受俄羅斯戰敗，中國下場後，周邊小國/地區絕對蠢蠢欲動...再加上中東本就混亂...各大國內部都內卷嚴重，失業+互聯網帶來的價值觀碰撞也引發了種族間的仇恨，而全球人口已經近80億，資源已經不足以支撐80億人的正常生活。不來場戰爭消滅掉一大半的人，內卷停不下來。

普京自然希望按自己的劇本走，想速戰速決，然後快速撤兵，在北約手段之前快溜。但北約不會讓普京如願，肯定希望把俄羅斯拖在烏克蘭持續放血，重演阿富汗的故事。這不，已經開始軍援了。

這時候普京就說，信不信我敢發射核彈，大家一起玩完。不信？之前你們也不信我會打仗的。你們猜我有沒有回歸於盡的勇氣和瘋狂？畢竟，如果這世界沒有俄羅斯，還要這世界幹嘛，對吧？

這時候就會疑神疑鬼了，是啊，就普京的人設，以為他不敢打，他打了。後面再以爲他不敢回歸於盡，他敢不敢呢？普京真的沒有勇氣回歸於盡嗎？

作爲心理戰術，普京自然是希望嚇住人的。但要真嚇不住，就100%鐵定真的不會發生嗎？天知道。

戰爭這種事情絕對不是誰的一兩句可以左右的，一開始大家以爲不會打，結果打了。大家以爲速戰速決，結果打得焦灼。大家以爲美國等北約怂了烏克蘭也會怂，誰知道美國北約底氣越來越硬，烏克蘭腰桿也撐起來了。

而說好的和談，俄羅斯一邊準備好核武器一邊繼續打。

俄烏戰爭會不會升級成大的戰爭，決定權在西方手裏，準確地說在英美和猶大群體手裏。

不要看俄國人很鐵血、不忍氣，實際上即便普京上臺後做的一系列軍事行動都是在「被動應對」。憑俄羅斯現在的實力不足以出去主動禍害世界。

中國更是如此了，埋頭發展，希望和平發展。即便臺灣問題其實也是民進黨當局在美日怂恿下不得不被迫去應對。中國不太可能主動出擊去武統，更不可能希望和助推事態升級。

聯合國五常裏法國沒有什麼存在感，真正能攪動世界的只是英美+掌控國際資本的猶大群體。俄烏開戰，美國聲明在任何情況下都不會軍事參與。有人說美國怂了，其實這是爲「反戰」輿論進行鋪墊。如果俄烏戰爭演變成世界大戰，美國會占大便宜。目前美國已經建國250年，基本已經到了中老年，在走下坡路（相對而言），內部矛盾幾乎不可調

和，所以美國一直通過戰爭轉移國內矛盾，到現在局部的小戰爭已經滿足不了美國了，世界大戰級別的戰爭或許就是美國一直想找的路。

這就是爲什麼以美國爲首的北約一直在拱火，撩撥烏克蘭去打俄羅斯，是因爲美國真的想打三戰啊！

還有一點至關重要，就看中國是否下場，如果中國趁機武統臺灣，就意味

著第三次世界大戰就來了，中俄對抗以美國爲首的北約，打得過麼？很難！後面還有日韓捅刀子，如果打結果未知。

的中文電視平臺，您家如果安有iTalkBB，收看效果更好！也可以在美南新聞網站 scdaily.com，youtube 上搜索 Stv15.3 Houston，訂閱美南新聞頻道，隨時收看美南國際電視的節目。美南國際電視多平臺覆蓋，您隨時隨地都可以收看到美南國際電視。

## Memorial Oaks舉辦清明節VIP新墓產發布會 今年最好的優惠折扣 只在3/13發布日有效

（本報休斯頓報導）清明節是中國傳統四大節日之一，萬物此時生長萌發，清潔而明淨，故稱清明。這也是紀念祖先的節日，家人一同去掃墓祭祖，緬懷先人，同時踏青。日昇日落，人生也是如此，在人生的旅途之中，死亡是每個人必須面臨的大課題，有上車也有下車的時候，不同站有不同的風景。無論貧富貴賤、種族、職業，上至總統下至庶民，都有不得不面對之時。如何面對終點做好生前計畫、以及該怎麼準備身後之事，似乎變得更正面、也更需要趁早計畫。

### 以豁達的心態面對

以往，華人對於生死大事比較忌諱，然而，隨著時代演變，更多人會以豁達的心態面對，去年的疫情，更改變了許多人對生死的態度。疫情的肆虐下，美國因爲新冠疫情而死亡的人數超過94萬人，所謂的「身後事」，並不意味著應該等到年紀大了才考慮，其實，現在就可以開始部署「生前計畫」。

Dignity Memorial(尊嚴紀念館)是休士頓最具規模的殯儀館兼紀念墓園，我們請到其中的陳專員來爲民衆談談，爲什麼「生前計畫」如此重要？可以幫助我們降低哪些方面的負擔？

### 對生死越想得開，會越沒有壓力

陳先生表示，傳統觀念中，「身後事」對於華人來說相當重要，許多人都希望找到一個風水寶地安葬，並且庇佑後代子孫，這種觀念深植人心。

以往「生死大事」對於中國人來說

是個禁忌話題，但對於殯葬業而言是每天都在面對的，死亡也天天都在不同地方上演著，民衆對死亡抱持越想得開的態度，自己會越沒有壓力，在生前就做好身後的規畫，會幫自己以及家人帶來安寧與平和。對墓地和葬禮進行預先計劃極爲重要，這樣的生前預先計畫將可以幫助到家庭，以下將爲大家分析說明。

### 生前預先計畫減輕親人的負擔

當選擇生前預先計劃時，不僅可以按照自己的想法來規畫，還可以減輕家人的情感壓力與經濟負擔。

生前預先計劃自己的葬禮，可以仔細考慮自己喜歡的選擇，確保是自己想要的方式。有些人有宗教信仰，但與子孫之間有差異，即使告訴家人自己的臨

終願望，家人也有可能不記得或不同意。要確定葬禮是自己所希望的，唯一方法是提前計劃。

一位民衆林先生表示，自己的父母多年前做生前預先計劃，購買了預付的喪葬費。經過這些年來，當父母親去世，去使用這些服務時，才知道省下許多費用，減輕很大的負擔。

父母親的生前預先計劃，使子孫在遭受喪親之痛時，幫助他們不必同時擔心喪葬費的金錢來源。一般來說，在人死後的幾天裡，他的資產可能無法使用，人壽保險可能需要六至八週的時間才能支付。如果沒有適當的預付計劃，則家人將被要求在葬禮服務之前支付所有

若是突然遭遇意外，子女往往會面臨很多意想不到的抉擇，例如像：爸爸會想要手工雕刻的堅固紅木棺材嗎？媽媽會希望她教會的朋友都參加葬禮嗎？如果事先沒有準備好計劃，親人會有很多猜測，擔心會不會弄錯了。通過生前預先計劃，使家人免於產生疑問和焦慮。

### 家人不必面對倉促的決定

在需要時，葬禮安排通常在幾天之內進行。即使在遺囑中表達自己的意願，您的孩子也有可能會爭執不休，因爲葬禮通常是在遺囑確定或宣讀之前舉行的。爲了保護您的親人在困難的時期內避免匆忙做出決定，提前計劃自己的葬禮，以書面形式寫下詳細內容，不僅可以確保自己的意願得到遵守，而且可以使家人不必代你做出判斷。

### 親人可以專注於回憶和康復

親人死亡後的一段日子中，家人會經歷情感上的困難階段。生前預先計劃自己的葬禮，無論是土葬或是火葬，葬禮應如何安排，都能記錄您的意願，並支付安排費用，這可爲您的親人提供他們所需要的情感與精神恢復時間，而不用做出一個又一個的葬禮細節決定。家人們可把時間用在與親友間共度中，回憶過世親人的點點滴滴，並逐漸恢復難受的心情。

### 清明節VIP新墓產發布會，優惠僅

### 在開放日有效

在休斯頓，許多家庭給予橡林紀念園殯儀館和墓園(Memorial Oaks) 很高評價，是最受華裔人士中意的風水寶地，也是既有墓地、又有殯儀館的複合型服務，能包辦追悼會到葬禮一條龍式服務。

Memorial Oaks 在清明節前對大衆推出優惠，歡迎參加在3月13日(星期天)舉辦的清明節VIP新墓產發布會，對公衆開放參觀(可預約網上視頻約會或現場參觀)。包括高達18% OFF生前計劃墓產優惠，60個月0%利率，無需信用評估，還有身前契約高達12% Off的優惠。

這是今年最好的優惠折扣，僅在開放日有效，請立即致電：吳玉玲 832-494-6710。Memorial Oaks 地址: 13001 Katy Freeway | Houston。
