New York City public schools to remain closed for rest of school year: mayor

File Photo: A view of the Manhattan skyline as seen from the Linden Hill Cemetery during the outbreak of the coronavirus disease (COVID-19) in the Brooklyn borough of New York City, New York, U.S., April 6, 2020. REUTERS/Brendan Mcdermid

(Reuters) - New York City Mayor Bill de Blasio said on Saturday public schools will remain closed for the rest of the school year as the city battles the outbreak of the novel coronavirus. "Having to tell you that we cannot bring our schools back for the remainder of this school year is painful, but I can also tell you it is the right thing to do," he told a news conference.

De Blasio had ordered public schools shut beginning March 16 to curb the spread of the disease, with an initial goal of reopening by April 20. But the mayor said it soon became clear that date goal was unrealistic as the city emerged as a major U.S. coronavirus hot spot.

Apple, Google plan software to slow virus, joining global debate on tracking

(Reuters) - Apple Inc (AAPL.O) and Alphabet Inc's (GOOGL.O) Google said on Friday that they will work together to create contact tracing technology that aims to slow the spread of the coronavirus by allowing users to opt into logging other phones they have been near.

The rare collaboration between the two Silicon Valley companies, whose operating systems power 99% of the world's smartphones, could accelerate usage of apps that aim to get potentially infected individuals into testing or quarantine more quickly and reliably than existing systems in much of the world. Such tracing will play a vital role in managing the virus once lockdown orders end, health experts say.

The planned technology also throws the weight of the tech leaders into a global conflict between privacy advocates who favor a decentralized system to trace contacts and governments in Europe and Asia pushing centralized approaches that have technical weaknesses and potentially let governments know with whom people associate.

"With Apple and Google, you get all the public health functions you need with a decentralized and privacy-friendly app," said Michael Veale, University College London legal lecturer involved in European contact tracing system DP3T. Centralized solutions such as those proposed in Britain and Germany would no longer work under the new technology, he said.

To be effective, the Silicon Valley system would require millions of people to opt in the system, trusting the technology companies' safeguards, as well as smooth oversight by public health systems.

The companies said they started developing the technology two weeks ago to streamline technical differences between Apple's iPhones and Google's Android that had stymied the interoperation of some existing contact tracing apps.

Under the plan, users' phones with the technology will emit unique Bluetooth signals. Phones within about six feet can record anonymous information about encounters.

People who test positive for the virus can opt to send an encrypted list of phones they came near to Apple and Google, which will trigger alerts to potentially exposed users to seek more information. Public health authorities would need to sign off that an individual has tested positive before they can send on the data.

The logs will be scrambled to keep infected individuals' data anonymous, even to Apple, Google and contact tracing app makers, the companies said. Apple and Google said their contact tracing system will not track GPS location.

"To their credit, Apple and Google have announced an approach that appears to mitigate the worst privacy and centralization risks," Jennifer Granick, surveillance and cybersecurity counsel for the American Civil Liberties Union, said.

WHO says looking into reports of some COVID patients testing positive again

GENEVA (Reuters) - The World Health Organization (WHO) said on Saturday that it was looking into reports of some COVID-19 patients testing positive again after initially testing negative for the disease while being considered for discharge.

South Korean officials on Friday reported 91 patients thought cleared of the new coronavirus had tested positive again. Jeong Eun-kyeong, director of the Korea Centers for Disease Control and Prevention, told a briefing that the virus may have been “reactivated” rather than the patients being re-infected.

The Geneva-based WHO, asked about the report from Seoul, told Reuters in a brief statement: “We are aware of these reports of individuals who have tested negative for COVID-19 using PCR (polymerase chain reaction) testing and then after some days testing positive again.

“We are closely liaising with our clinical experts and working hard to get more information on those individual cases. It is important to make sure that when samples are collected for testing on suspected patients, procedures are followed properly,” it said.

According to the WHO’s guidelines on clinical management, a patient can be discharged from hospital after two consecutive negative results in a clinically recovered patient at least 24 hours apart, it added. Based on current studies, there is a period of about two weeks between the onset of symptoms and clinical recovery of patients with mild COVID-19 disease, the agency said. “We are aware that some patients are PCR positive after they clinically recover, but we need systematic collection of samples from recovered patients to better understand how long they shed live virus,” it said.

REUTERS/Kim Hong-Ji/File Photo South Korean health officials said on Friday that it remains unclear what is behind the trend, with epidemiological investigations still under way.

“As COVID-19 is a new disease, we need more epidemiological data to draw any conclusions of virus shedding profile,” the WHO said. The number of deaths linked to the novel coronavirus reached 100,000 on Friday, as reported cases passed 1.6 million, according to a Reuters tally.

Funds Available For Businesses With Up To 10,000 Employees Federal Reserve Announces Details For \$2.3T Main Street America Lending Program

FILE – In this Jan. 29, 2020 file photo, Federal Reserve Chair Jerome Powell pauses during a news conference in Washington. The Federal Reserve is taking additional steps to provide up to \$2.3 trillion in loans to support American households and businesses as well as local governments as they deal with the coronavirus. (AP Photo/Manuel Balce Ceneta, File)

Compiled And Edited By John T. Robbins, Southern Daily Editor

The Federal Reserve said it will rollout more than \$2 trillion worth of government loans to help ease the pain caused by the coronavirus. On Thursday, the Fed announced details from its anticipated Main Street Lending Program, which includes funds for businesses with up to 10,000 employees. It also props up the Payroll Protection Program, which keeps workers on the books with their employers. This prevents them from having to file for unemployment and allows them to keep any health benefits their jobs offer. In a recent statement, Federal Reserve chairman Jerome Powell said, “the Fed’s role is to provide as much relief and stability as we can during this period of constrained economic activity.”

Powell also assured that the Fed plans to keep interest rates to near zero until “they are confident the economy has weathered the storm and is on track to achieve maximum employment and stability goals.”
The announcement came after weekly jobless claims continued to surge amid the coronavirus pandemic. The Labor Department reported 6.6 million Americans filed initial claims for unemployment benefits last week, which sharply beat expectations of 5 million.
The prior week’s claims were also revised higher by nearly 220,000, which brought the total over the past three weeks to more than 16 million unemployed Americans. The surge in claims came after businesses shutdown to prevent the spread of COVID-19.

States Unemployment Websites, Hotlines Crashing After 10M People File New Claims In Recent Weeks

A worker, right, hands out paper unemployment applications after a batch of applications in English were brought in, Tuesday, April 7, 2020, at Babcock Park in Hialeah, Fla. (AP Photo/Wilfredo Lee)
A line of people were seen stretched around the block in Hialeah, Florida in violation of the state’s social distancing guidelines. However, the people risking their health had no choice as standing in line Tuesday was the only way to get an application for unemployment after the county’s online application portal

crashed and those who tried to calling the hotline were forced to wait for hours on hold.
In recent weeks, more than 10 million people filed unemployment claims, which is a number that is set to push the unemployment rate past 10 percent in April. States were not prepared for the rush of applications and most systems quickly crashed.
“It’s just too overloaded right now, we’ve got no one to help because they can’t,” explained Dana Simone, and unemployed Michigan resident. “There’s so many people trying to apply for benefits right now that both online and the phones are totally overloaded.”
In recent weeks in New York, 450,000 people found out the delays on their applications were due to the state using software more than 40 years old to process applications.

“It took probably two hours for me to actually be able to fill and submit the claim because the website is very slow,” recounted Weslynn Therasse, an unemployed nurse in New York. “It kept on freezing and crashing...it took about two hours.”
With people unable to receive either a paycheck or unemployment benefits, some bills are not being paid. In the last weeks of March, calls for a rent strike circulated across social media with tenants arguing the pandemic made paying their lease less of a priority.
“I was unemployed, or am unemployed, and just barely scraping by,” said Neal Miller, an unemployed resident of Illinois. “Now with this new reality, this crisis, is just makes sense to withhold rent from our landlords and to simply say that we’re not going to pay for what is effectively our means of survival.”

The National Multifamily Housing Council reported Wednesday that nearly a third of apartment renters did not pay April rent.
For renters in government housing or in the 28 states that have adopted policies to prevent evictions, not paying rent may not have immediate consequences. However, analysts worry the lack of payment may result in a domino effect going from tenant to landlord to bank to another government bailout. (Courtesy <https://www.oann.com/>)

Coronavirus Survivor: ‘In My Blood, There May Be Answers’

Tiffany Pinckney poses for a portrait in the Harlem neighborhood of New York on April 1, 2020. After a period of quarantine at home separated from her children, she has recovered from COVID-19. Pinckney became one of the nation’s first donors of “convalescent plasma.” Doctors around the world are dusting off a century-old treatment for infections: Infusions of blood plasma teeming with immune molecules that helped survivors beat the new coronavirus. (AP Photo/Marshall Ritzell)

Compiled And Edited By John T. Robbins, Southern Daily Editor

NEW YORK (AP) — Tiffany Pinckney remembers the fear when COVID-19 stole her breath. So when she recovered, the New York City mother became one of the country’s first survivors to donate her blood to help treat other seriously ill patients.

“It is definitely overwhelming to know that in my blood, there may be answers,” Pinckney told The Associated Press.

Doctors around the world are dusting off a century-old treatment for infections: Infusions of blood plasma teeming with immune molecules that helped survivors beat the new coronavirus. There’s no proof it will work. But former patients in Houston and New York were early donors, and now hospitals and blood centers are getting ready for potentially hundreds of survivors to follow.

The Food and Drug Administration Fri-

day announced a national study, led by the Mayo Clinic, that will help hospitals offer the experimental plasma therapy and track how they fare. The American Red Cross will help collect and distribute the plasma.

“There’s a tremendous call to action,” said Dr. David Reich, president of New York’s Mount Sinai Hospital, which declared Pinckney recovered and raced to collect her blood. “People feel very helpless in the face of this disease. And this is one thing that people can do to help their fellow human beings.”

In this March 26, 2020 photo pro-

vided by Tiffany Pinckney, she donates blood for a study at a hospital in New York after recovering from COVID-19.

“It is definitely overwhelming to know that in my blood, there may be answers,” said Pinckney, 39, (Courtesy Tiffany Pinckney via AP)

As treatments get underway, “we just hope it works,” he said.

What the history books call “convalescent serum” was most famously used during the 1918 flu pandemic, and also against measles, bacterial pneumonia and numerous other infections before modern medicine came along.

Why? When infection strikes, the body starts making proteins called antibodies specially designed to target that germ. Those antibodies float in survivors’ blood — specifically plasma, the yellowish liquid part of blood — for months, even years.

When new diseases erupt and scientists are scrambling for vaccines or drugs, it’s “a stopgap measure that we can put into place quickly,” said Dr. Jeffrey Henderson of Washington University School of Medicine in St. Louis, who is helping to develop a nationwide study. This “is not a cure per se, but rather it is a way to reduce the severity of illness,” Henderson said.

Doctors don’t know how long survivors’ antibodies against COVID-19 will persist. But for now, “they’re the safest ones on the street,” said Dr. Rebecca Haley of Bloodworks Northwest in Seattle, which is working to identify donors. “We would not be making a dent in their antibody supply for themselves.”

Last week, the Food and Drug Administration told hospitals how to seek case-by-case emergency permission to use convalescent plasma, and Houston Methodist Hospital and Mount Sinai jumped

at the chance.

When Tiffany Pinckney was seriously ill with the coronavirus, all she could do was pray that she didn’t give it to her two sons or her co-workers. Now that she is recovered, she’s hoping there’s something in her blood that will help others. (April 3)

And a desperate public responded, with families taking to social media to plead on behalf of sick loved ones and people recovering asking how they could donate.

According to Michigan State University, more than 1,000 people signed up with the National COVID-19 Convalescent Plasma Project (<https://ccpp19.org/>) alone. Dozens of hospitals formed that group to spur plasma donation and research.

Would-be donors can’t just show up at a blood center. Those with a proven infection who’ve been symptom-free for several weeks must get tested to ensure the virus is gone. They also must be healthy enough to meet the other requirements for blood donation — plus get an additional test to see if their antibody level is high enough.

“You don’t want to take plasma from someone who had a mediocre immune response. That wouldn’t be helpful,” said Dr. Julie Ledgerwood of the National Institutes of Health.

Chinese doctors last week reported that five patients given convalescent plasma all showed some improvement about a week later. But they also received other therapies, and without a rigorous study, there’s no way to know if the plasma made the difference.

Studies are being planned to test convalescent plasma against regular care in sick patients, and to prevent infections among

people at high risk of exposure such as health care workers.

Regeneron Pharmaceuticals’ preclinical manufacturing lab where selected antibodies for preclinical and toxicology studies will be made in stainless-steel bioreactors.

Another approach: Spain-based plasma manufacturer Grifols aims to concentrate donor plasma in a North Carolina factory, creating a high-dose version that also would need testing.

Separately, NIH researchers are measuring survivors’ antibody levels to learn how strong the vaccines under development must be to protect. Other teams, including at Beijing’s Tsinghua University, are hunting which antibodies are most potent, to copy in a lab and turn into drugs.

But donations from people like Pinckney could be used as fast as blood centers can process it. She got sick the first week of March. First came the fever and chills. She couldn’t catch her breath, and deep breathing caused chest pains. The single mother worried about her sons, 9 and 16.

“I remember being on my bathroom floor crying and praying,” the 39-year-old said. So when Mount Sinai, which diagnosed her, called Pinckney to check on her recovery and ask if she’d consider donating, she didn’t hesitate.

“It’s humbling. And for me, it’s also a beacon of hope for someone else,” she said. (Courtesy <https://apnews.com/>)

《清平樂》熱播口碑爆棚 江疏影遇王凱壹見傾心

正在湖南衛視金鷹獨播劇場熱播的電視劇《清平樂》憑借性格鮮明的人物塑造、娓娓道來的故事情節和演員收放自如的表演，上線兩天便引發網友熱議。截至目前，豆瓣評分達8.1，相關話題#清平樂#登上微博熱搜榜TOP3，#王凱被窩吻#登上微博熱搜榜TOP17，劇集期待值持續走高。《清平樂》根據米蘭lady小說《孤城閉》改編，朱朱擔任編劇，張開宙執導，侯鴻亮任制片人，王凱、江疏影領銜主演，任敏、楊功、邊程、葉祖新、喻恩泰、王楚然、劉鈞、馮暉、張本煜主演，吳越、許齡月、曹曦文特別出演的古裝大劇。該劇以宋仁宗趙禎的

壹生為線索，描繪了北宋在仁宗盛治時期世清平、人安樂的繁華盛景，同時，也著力刻畫了壹個具有煙火氣息的帝王。

太後仁宗之爭勝負將分 丹姝初遇趙禎情竇初開

《清平樂》上線兩天，通過前朝後宮幾場交鋒將仁宗（王凱 飾）太後母子的膠著對壘鋪敘開來，隨著韓琦（楊功 飾）、範仲淹（劉鈞 飾）、歐陽修（張本煜 飾）等角色的上線，前朝暗流湧動，太後與仁宗間的齟齬有愈演愈烈之勢。

在昨晚的劇情中，太後劉娥（吳越 飾）借久旱不雨之事提出自己輔政未事事躬親而受上天責難，不願撤簾；仁宗則以自己身為社稷之主、萬民之君表示願與朝臣共修政事、以答天戒而獲得群臣表態支持。另壹方面，仁宗生母李順容（車曉 飾）死訊的傳來令他悲痛欲絕，而苗心禾（許齡月 飾）的溫柔陪伴彌補了他親情的缺失感，讓他情難自禁的接納承兒成為家人，引得網友感嘆“太心疼仁宗了”、“我也想抱抱六哥安慰他”、“想魂穿苗心禾”。此外，曹丹姝（江疏影 飾）進宮初遇趙禎壹見

傾心，恨自己不是男兒不能入朝為官輔佐於他，引網友調侃“趙禎第壹事業粉是丹姝實錘了”、“嫁給他不好嗎非要入朝為官”。與此同時，少女丹姝展露的情竇初開、伶俐通透也為後續嫁入宮中與趙禎雖為夫妻卻更似君臣的情節轉折埋下伏筆。

小火慢燉劇情熬出文氣 細節鋪陳繪就大宋畫卷

該劇上線兩天情節豐富，網友熱議居高不下，在劇集節奏上不是採取沖突密集高潮不斷的敘事手法，而是通過娓娓道來的細節鋪陳將壹卷明朗

開闊的宋代畫卷徐徐展開，畫卷中有文人雅士的綽約風姿、有動人心弦的情深意長、有風起雲湧的廟堂紛爭、有河清海晏的盛世繁華……劇集在情境氛圍恰到好處、劇情進展循序漸進的情況下進行情節推動，如小火慢燉般熬煮出獨屬於宋代的儒雅格調，於素雅之中展現其內斂意蘊。

在即將與觀眾見面的劇情中，劉娥與趙禎的母子之爭也將隨著太後薨逝落下帷幕，在此之前母子心結能否解開？如約完成婚禮的曹丹姝又會如何處理這段婚姻？今晚20:00湖南衛視金鷹獨播劇場繼續播出，精彩劇情不容錯過。

《龍嶺迷窟》互動劇將上線 與高偉光開啟沈浸式互動

由管虎監制，費振翔執導的探險懸疑網劇《龍嶺迷窟》於上周三正式開播。開播當天不僅占據各大平臺電視劇榜單首位，豆瓣評分更飆升至8.4分，實現收視口碑雙豐收。劇中人物角色的完成度、場景道具的還原度以及逗貧的京腔對話成為了觀眾熱議的話題。本周三，胡八壹（潘粵明飾）、Shirley 楊（張雨綺飾）、王胖子（姜超飾）三人將在古藍縣正式匯合，而劇中的另壹主要角色鷓鴣哨（高偉光飾）也即將回歸。同時，互動劇《龍嶺迷窟》最後的搬山道人，將於4月8日晚20:00與更新劇集壹同播出，以沈浸式互動玩法豐富觀眾的看劇體驗。

鐵三角古藍縣重聚 鷓鴣哨黑水城再尋珠

在上周播出的前六集中，胡八壹、王胖子和大金牙三人的尋寶之旅歷經坎坷，先後上演了勇鬥鐵頭龍王、古藍縣街頭混戰、迷窟蝙蝠群追逐大戲。劇中驚險刺激的場面引人入勝，節奏緊湊高能不斷，讓

觀眾愈發期待接下來的劇情發展。在已釋放的後續預告中，潘家園探險小隊雖從窟中逃生，但胡八壹和王胖子身上卻出現了眼狀紅斑，與此同時，Shirley 楊和孫教授也來到了古藍縣探尋龍骨天書的秘密，鐵三角重聚在即，紅斑背後的故事將為大家壹壹道來。

本周，鷓鴣哨將在外孫女Shirley 楊的回憶中上線，瓶山壹行後，鷓鴣哨為解族人詛咒再次踏上了尋找電塵珠的旅途。為拜了塵大師（高雄飾）學習分金定穴之術，鷓鴣哨獨闖兇穴取殮服，最終拜師成功，並與了塵大師、美國人托馬斯（左右飾演）前往黑水城共同探尋電塵珠的下落。原著中藏寶無數、機關重重的黑通天大睡佛寺也將在劇中還原。從今日發布的預告片來看，鷓鴣哨在巨斧墓道中大展身手，眾多硬核動作場面將是本劇又壹看點。

創新互動劇體驗升級 解鎖鷓鴣哨N種結局

除此之外，互動劇《龍嶺迷窟》最後的搬山道人》也將在劇集更新時同步上線，劇中不僅有高偉光、高雄、左右三位主演，辛芷蕾、盛冠森、阿麗亞也會以彩蛋形式特別出演。觀眾將在互動劇中化身鷓鴣哨挑戰完成尋找

電塵珠的使命，深度體驗驚心動魄的探險之旅，例如開棺槨之前在東南方點燃蠟燭，使用掘屍索、黑驢蹄子等摸金工具，在雞鳴燈滅前取得南宋女屍殮服，體驗搬山派獨門技藝，施展口技、投擲飛虎爪、巧妙破解機關陣法，同了塵大師和托馬斯壹起通過玄幻長廊、深淵立柱、地宮墓道等重重機關。宛如遊戲闖關般的互動增強了觀劇時

的操縱感和代入感，大大豐富了觀眾的觀劇體驗。

體驗過程中，觀眾在屏幕出現的指令下判斷劇情走向，選擇情節發展，並根據指令進行互動操作，從而解鎖支線、隱藏劇情、彩蛋，以及6個完全不同的結局。鷓鴣哨黑水城壹行將被如何“逆天改命”？尋找電塵珠的家族使命又能否完成？種種疑問將交給觀眾自行作答。

精彩 節目介紹

《美南新聞聯播》

美南新聞聯播是一檔美南國際電視台
今年最新推出的晚間直播新聞類節目。

節目介紹：

美南新聞聯播是一檔美南國際電視台今年最新推出的晚間直播新聞類節目。由特約主播高白，向觀眾朋友們介紹全球，美國，中國，以及台灣地區最新發生的新聞。不僅如此，美南新聞聯播還會在節目中連線加州以及加拿大華人電視台，給您帶來北美最全面的新聞資訊。

播出時間：

節目播出時間為周一至周五每天晚間6:30，次日早間7:00重播。
敬請關注。

美南廣播電視台 看電視聽廣播

美南國際電視STV15.3為方便觀眾收看，
「電視廣播合為一體」

不需任何付費，
觀眾可24小時直接收看及收聽該頻道，
行車間也可方便收聽，輕鬆獲取美南電視節目
以及各類國際、社區重大資訊。

操作指南如下，讓觀眾24小時收看收聽：

1. 掃二維碼(QR code)：

觀眾只要掃描報上的二維碼，
就可連結到美南國際電視，
直接在手機上觀看STV15.3。

2. Google搜尋：

觀眾只要在Google網站搜尋
「Southern TV- STV15.3 Houston」

STV15.3 Houston

或輸入該平台網址

「http://media.maqtv.com/?1497381&proc=1」

就可直接連結美南國際電視直播平台。

http://media.maqtv.com/?1497381&proc=1

3. 下載Apps收看：

可在蘋果商店搜尋

「Today America」，
下載Apps，除了
可用手機讀報
更方便，也可以在Apps裡
收看STV15.3 電視直播。

如需開車時收聽廣播，請連接至車載音響設備(數據線/藍牙設備)，效果更佳。

《美南大咖談》報紙預告：

意見領袖、時尚先鋒、行業精英、
業界大咖.....
熱點時事、熱門話題、勵誌故事、
傳奇人生.....

美南國際電視最新訪談欄目

《美南大咖談》隆重上線！

休士顿公园因复活节周末关闭以帮助减缓 COVID-19 的传播

【休士顿讯】市长西尔维斯特·特纳宣布关闭所有休士顿公园和娱乐部的公园和小径复活节假期周末。关闭开始于4月9日星期四日落。做出这一决定是为了公共安全,以帮助减缓 COVID-19 在一年中最繁忙的城市公园之一的传播。城市公园巡警和休士顿警方将在周末巡逻城市公园,以监控合规性。

"我知道复活节周末传统上是家庭涌入我们的公园烧烤和复活节彩蛋狩猎的时候。今年,我要求大家呆在家里,继续社会交往,"市长西尔维斯特·特纳说。"我希望在城市公园放假时保持开放,但周四我们新增了615例 COVID-19 病例,另有两例死亡。我们必须尽一切可能,共同努力,以减缓 COVID-19 的进展。

城市公园和小径将于4月13日星期一日出时重新开放。然而,所有公园游乐场、篮球场、健身器材、溜冰场、水上游乐场,以及城市拥有的高尔夫球场、驾驶场、纪念公园网球中心、李乐清网

COVID-19 检测

【本报讯】实验室检测可以确认呼吸道样本中的 COVID-19 病毒。各州和地方公共卫生部门已经收到 CDC 提供的试剂盒,而医疗提供者的试剂盒来自商业生产商。

谁应接受检测

并非每个人都需要接受 COVID-19 检测。以下信息可帮助您确定是否需要护理或检测。

大多数人出现轻微症状并能够居家康复。

对于此病毒,目前尚无已批准的针对性治疗方法。

检测结果可能有助于确定您应与谁联系。

CDC 已提供谁应接受检测的指南,但是否进行检测应由州和本地卫生部门及/或个体临床医生酌情决定。

临床医生应与所在州和本地卫生部门合作,通过公共卫生实验室或与临床或商业实验室合作协调检测。

如何获取检测

如果您出现 COVID-19 症状并希望接受检测,请尝试联系您所在州或当地卫生部门或医疗提供者。虽然这些试剂盒的供应已增加,但仍然可能很难找到提供检测的地点。

检测后怎么做

如果您的 COVID-19 检测结果呈阳性,请参见如果您生病了或正在照顾病人页面。

如果您的 COVID-19 检测结果呈阴性,则说明在收集您的样本时,您可能没有被感染。但是,这并不意味着您不会生病。可能的情况是,收集样本时,您还处于感染早期,之后您的检测结果也可能呈阳性,或者您在此次检测之后被感染,随后出现疾病症状。换言之,阴性检测结果并不能排除之后生病的可能。

CDC 预计 COVID-19 会在美国广泛传播。在接下来的几个月中,美国大部分人口都将接触此病毒。您应继续采取所有 CDC 建议的保护措施,保护您和他人不被传染。参见如何保护自己。

额外信息:美国食品药品监督管理局 SARS-CoV-2 诊断检测常见问题 (FAQ) external icon。

如果您病情严重,请立即寻求医疗帮助

何时寻求医学治疗

如果您出现 COVID-19 紧急警告体征,请立刻寻求医学治疗。紧急警告体征包括*:

- 呼吸困难
- 胸部持续疼痛或压迫感
- 精神恍惚或意识不清
- 嘴唇或脸色发紫

*此处未列出所有症状。如有其他严重或令人担心的症状,请咨询您的医疗服务提供者。

医疗护理专业人员

关于医疗护理专业人员检测的更多信息,参见医疗护理专业人员临时指南,获取报告、检测和样本收集建议。

国会议员阿尔格林和本德堡县第九届国会选区民选官员宣布 PPE 捐赠驱动

(德克萨斯州休士顿) • 2020年4月16日(星期四),众议员阿尔·格林(Al Green)与本德堡县法官 KP 乔治、密苏里州市长约兰达·福特和斯塔福德市长伦纳德·斯卡斯拉拉合作,将举办个人防护装备(PPE)捐赠活动。捐赠活动将于美国东部时间上午 10 点至下午 12 点在斯塔福德中心举行,位于斯塔福德,斯塔福德,TX 77477。
