Lebanese soldiers stop pro-Palestinian protesters from crossing Lebanon-Israel border

BEIRUT, May 15 (Xinhua) -- Lebanese soldiers clashed on Saturday with pro-Palestinian demonstrators while trying to stop them from crossing a barbed wire fence between Lebanon and Israel, the National News Agency reported.

Hundreds of protesters took part on Saturday afternoon in demonstrations on Lebanon's borders with Israel in solidarity with the Palestinians in Gaza.

Meanwhile, Lebanese army soldiers were deployed in the area to prevent any escalations from Lebanon.

A day earlier, demonstrations resulted in the killing of one Lebanese citizen by gunshot as the Israeli army fired machine guns, smoke bombs and tear gas towards Lebanese protesters who tried to break into the Israeli side.

This has sparked anger among Lebanese authorities who asked for the intervention of the international community to put an end to Israeli aggression against the Lebanese and Palestinians

California announces new plan to boost film industry

LOS ANGELES, May 14 (Xinhua) -- California Governor Gavin Newsom on Friday announced a new measure to attract productions to the Golden State by adding 30 million U.S. dollars to its film and television tax incentive program.

As part of the 100-billion-dollar "California Roars Back" plan, this move would boost the existing 330 million dollars tax credit program by nearly 10 percent, allowing the state to dole out a total of 360 million dollars annually to qualify film and television projects.

This new plan was applauded by the entertainment industry immediately. According to Los Angeles City's Economic and Workforce Department, this industry brought more than 30 billion dollars annually to California and supported more than 200,000 local jobs before the COVID-19 pandemic.

California Film Commission Executive Director Colleen Bell told the Hollywood Reporter, a leading entertainment news website, that thanks to the state's current film incentive program introduced in

2014, the state had welcomed nearly two dozen relocating television series from other regions since then.

"Governor Newsom's announcement to expand the film and TV tax credit program is great news for California," said Bell. "The additional 30 million dollars in funding will be allocated to relocating TV series, which bring long-term, high-wage jobs and significant production spending to our state. To date, our tax credit program has welcomed 23 relocating series from

other states and countries. The additional funding will enable us to grow that positive impact."

Moreover, Newsom said this measure was designed to show the state's political gesture against those states who passed voter suppression legislation, like Georgia.

"This is an opportunity for those productions, TV and others, in places like Georgia, whose values don't necessarily always align with the production crews to consider coming back to the

state of California," Newsom said at a press conference in Sacramento, capital city of the state, adding "that's what that 30 million dollars intends to do."

In recent days, Newsom announced a number of high-dollar initiatives, including an additional 12 billion dollars for homeless housing, 2 billion dollars to

Israeli army says attack from Lebanon thwarted

JERUSALEM, May 15 (Xinhua) -- Israel's army said on Saturday that its troops thwarted an attempted attack near the border fence with Lebanon.

The incident took place late on Friday night, it said.

Israeli troops spotted several persons approaching the border fence and then digging into the ground and cutting the fence, according to a statement issued by the army.

“The soldiers operated to stop the suspects according to standard procedures, including by firing towards their legs,” the statement read, adding that following the fire the suspects retreated back to Lebanon.

The army said that initial investigations and searches in the area indicated that the action had been planned in advance and the group was apparently armed with explosives.

They “acted in a way which indicates that they intended to infiltrate into Israeli territory” and carry out an attack in the area of Metula, a city in northern Israel.

The army said the Lebanese government should be held responsible for such incidents and warned “it will bear the consequences for any attempts to harm Israeli civilians.”

According to the statement, Israeli troops “are prepared in the area and ready to operate with determination as necessary in response to any attempt to violate Israeli sovereignty.”

The incident came a day after dozens of people from Lebanon briefly crossed the fence into Israeli territory. Israeli tanks fired toward them, injuring and killing a man.

Scientists Believe The Army’s Vaccine May Combat Deadly Variants And Even Future Pandemics

Army’s Own Vaccine That Could Fight COVID Variants Begins Human Trials

Soldiers prepare to administer the COVID-19 vaccine at Fort Hood, Texas, on Feb. 20, 2021. (Photo/Staff Sgt. Daniel Herman/Army)

Compiled And Edited By John T. Robbins, Southern Daily Editor

As more than 100 million Americans were needed and inoculated against COVID-19 with doses produced by pharmaceutical powerhouses like Pfizer and Moderna, a scrappy team of scientists in an Army lab just outside the nation’s capital quietly continued manipulating proteins, testing monkeys and working to conceive a vaccine of the future.

The product born of their experience, reason and labor was injected into its first human test subject on Tuesday.

“We want to win this battle, but we also want to win the long war,” said Dr. Kayvon Modjarrad, who leads the vaccine effort as director of the emerging infectious diseases branch of the Walter Reed Army Institute of Research (WRAIR) in Silver Spring, Maryland.

Once the virus was sequenced in January 2020, he and his then modest team of 10 strategized and took on a blistering 24/7 effort, whittling a selection of two dozen prototypes down to a single vaccine candidate within six months.

Over the last decade Modjarrad also led the Ar-

my’s vaccine efforts for Ebola and the Zika virus and was principal investigator of its campaign against MERS, a disease itself caused by a coronavirus. And though WRAIR is the oldest biomedical research institute within the Department of Defense, the emerging infectious diseases branch is still young.

Dr. Kayvon Modjarrad sits at his desk adorned with a 3-D model of the vaccine he co-invented. Modjarrad is the director of the emerging infectious diseases branch of the Walter Reed Army Institute of Research (WRAIR). (Photo Matt Seyler, ABC

News)

“We’re not Apple now -- we’re Apple 40 years ago, in the garage,” Modjarrad said with a laugh.

Despite the frantic pace, Modjarrad -- who co-invented WRAIR’s eventual vaccine candidate -- knew it wouldn’t be the first to the public.

“This one takes a little bit longer in designing and then manufacturing,” he said.

From the beginning his focus was on next-generation threats, ones that could be thriving in unknown bat caves as you read this sentence, waiting to make contact and proliferate inside humans.

“Even though we got the (available vaccines) within a year, how many hundreds of thousands of people in the U.S. and how many millions of people globally lost their lives before the vaccine was even available?” Modjarrad asked ABC News’ Bob Woodruff during an exclusive visit to the lab last week. “We want to get to a point where the vaccine is already out there -- maybe already in people’s arms -- before the next variant, next stream, next species of coronavirus occurs.”

The Walter Reed Army Institute of Research (WRAIR), founded in 1893, is located in Silver Spring, Md. (Photo/Matt Seyler/ABC News)

The three vaccines already authorized for use in the U.S. work by feeding the body genetic instructions to create the spike protein that is found on the surface of the virus. Once the body creates the protein, the immune system is alerted and begins forming antibodies. It’s a safe way of triggering a similar immune response as one a person would have after contracting the actual virus.

The WRAIR vaccine skips both the instruction and creation steps, bringing the already-formed spike protein straight into the arm along with an immune-boosting ad-

juvant compound, quickly starting the antibody response.

And unlike other protein-based vaccines being tested, the WRAIR candidate presents virus-looking nanoparticles, each with a consistent array of 24 spike proteins arranged in small bouquets of three protruding from a ferritin base.

“There’s a lot of theories as to why something presented in this fashion gives such a good immune response, but in some ways you can see it looks like a virus as well,” Modjarrad said. “So it has some properties that educate the immune response in a way that it gives you a very strong, but also a broad response.”

Test results with thousands of mice and dozens of monkeys have been promising.

A researcher works on coronavirus vaccine development at the Walter Reed Army Institute of Research in Silver Spring, Md., April 28, 2020. (photo/Matt Seyler/ABC News)

“We think (other) vaccines are probably going to be protective against new variants, but they might be decreased in their protection,” Modjarrad said.

“What we’ve seen with our vaccine so far in animals ... is that the vaccine is not decreased in effectiveness against those variants at all. And it is effective against other coronaviruses like SARS-1. So what we have developed now is starting to look like a pan-SARS vaccine ... and we’re going to start testing everything in between.”

If successful in clinical trials, WRAIR’s vaccine could become common among the U.S. population, possibly as a booster for already-vaccinated people.

Being a military lab, practicality was a primary design concern, which could incidentally give their product global appeal. In particular, it is highly stable and doesn’t require special freezing.

“That means you can put it in a cooler on the back of a motorcycle in the Amazon or the Sahara or wherever, and that vaccine should still be OK,” Modjarrad said.

But the “if” remains. Though the WRAIR scientists brim with confidence in conversation, they are soberly aware that their product has yet to be

proven in humans.

“They have some very early data to suggest in the laboratory that the immune response evoked by this vaccine will cover a variety of different strains,” said Dr. William Schaffner, a professor of preventative medicine and infectious diseases at Vanderbilt University in Nashville. “Whether that translates actually into protection in people against the variety of strains -- that remains to be determined. Long journeys, first steps.”

Cpt. Aaron Sanborn, RN, (far right), discusses the vaccination process with Francis Holinaty (left) during the first day of the vaccine entering clinical trials at the Walter Reed Army Institute of Research’s Clinical Trials Center, April 6, 2021. (Photo/Walter Reed Army Institute of Research)

On Tuesday, retired Army Col. Francis Holinaty stepped up to be the first to be injected in WRAIR’s Phase 1 trial.

“Over my 30-year career I have served in many places around the world in many different operational settings, some more arduous than others, some more hazardous than others,” Holinaty said. “And one day I’m on the Metro, and it’s almost as if it was fate -- I just looked up and I saw a poster, and I saw Walter Reed, and it took me a while to process what this poster was saying. And when it dawned on me that they were trying to do a trial for the COVID-19, I saw this as another opportunity to just serve.”

Holinaty can’t be sure whether he received a dose of the vaccine or a placebo, but said afterward that he felt fine. He wanted people to know that there are many ways to fight the pandemic.

“You don’t have to be in the military, you don’t have to be a first responder, but you can help all,” he said. “And if you have a calling to help people this is just one of the ways you can do it.” (Courtesy abcnews.go.com)

New Alief Neighborhood Center Represents Future Cultural Reality Of Area

Compiled And Edited By John T. Robbins, Southern Daily Editor

The Alief Neighborhood Center combines three City of Houston departments (Library, Parks, & Health) to create a civic center at the heart of the redeveloped 37-acre urban park. Raised out of the floodplain, the building’s elevated ‘front porch’ frames a space for the diverse community to come together, share ideas, and express an identity unique to Alief. The Center is a model for resilient design in a post-hurricane Harvey environment – a ‘Lilly-pad’ for those seeking shelter from the storm.

BUILDING AWARDS- Rethinking The Future Awards 2020 First Award | Public Building (Concept)

The \$52 million, 63,000-square-foot multi-purpose facility at 11903 Bellaire will combine a health clinic, community center and library into one space. The structure, which will sit in 37-acre Alief Park, will consolidate the Hennington-Alief Regional Library at 7979 South Kirkwood and the park’s existing community center, both of which are aging. It also will replace the area’s Women, Infants and Children Center, which today leases space at 12660 Beechnut. City council passed one item appropriating \$4.8 million for contractor EYP Inc. to begin construction on the new center, and another item giving Manhattan Construction \$100,000 for construction management services.

The 70,000sf 2-story new building is elevated over a parking area providing convenient access to the building programs directly above. Health Department programs provided include W.I.C. (Special Supplemental Nutrition Program for Women, Infants, and Children), DAWN (Diabetes

Awareness Network) that provides support for a variety of chronic illnesses, and a Senior Center. The Parks Department programs include a full-size competition gymnasium with a perimeter elevated walking track above, a community fitness center and spaces to support youth after-school and summer programs.

The library, located on the second floor, and accessed through a grand ‘stair-a-torium’ in the lobby contains light-filled stack-space and reading

areas with expansive views both to the park to the south and to the existing grove of preserved trees on the north. Directly adjacent to the library, HPL’s technology-rich TechLINK youth maker-doer program contains spaces for collaboration, the ‘Tiny Techs’ children’s area, music recording studio, virtual reality stations, photo/video lab, and a maker space.

Site amenities include a competition soccer field, two full-size practice soccer fields, two futsal courts (fast-paced soccer played on a hard-surfaced smaller court) baseball field, skate park, tennis courts, children’s playground, outdoor swimming pool facility, community gardens, a marketplace venue, and outdoor event space areas. The Alief Neighborhood Center is

scheduled to open in early 2022.

The Mission Of The Alief Neighborhood Center

To Foster A Culture Of Health

To Create A Heart For Civic Engagement

All In A Spirit Of Shared Collaboration

With The Biggest Front Porch In Texas!

Community Resource Center Opens

Sponsored by the ITC Community Empowerment Organization with the collaboration of the SEONE Corporation, the Community Resource Center opens its door on Tuesday, April 6, 2021, at the Southern News Group building.

The mission of the Community Resource Center is to serve as a “one stop-shop” for the underserved minority population in the southwest area of Houston. The Center will provide members of the community with information that will empower them to improve their quality of life and to also serve as a way for participants to access the rich pool of resources avail-

able to them.

Southern News Group, Houston, Texas

Members of the community who have questions about any of the variety of issues the Center will address are encouraged to schedule interviews with the Center. The Center will link the person with a professional who can best address their needs.

The areas the Center will address include disaster assistance, loans and grants, small business development, tax information, immigration, legal issues, workforce, housing and renting, veterans issues, medical, healthcare service, education, skills development, children and child welfare and city services.

The Center’s services will be led by senior educator, Dr. Tina Agosa and many other assistants.

讀懂5大關指標，掌握美國房市景氣

RE/MAX UNITED

聯禾

Q 投资者在投入房地产前，除了衡量自身的筹码，最重要的就是了解这盘棋该怎么下，了解整个市场的情况，以免盲目投入后才发现。本篇带你一次读懂房屋销售、房贷利率、市场房屋库存房屋售价中位数价格、房屋开工率等5大关键指标，让你轻松掌握美国房市状况。

聯禾地產中國城

電話：713-630-8000

地址：9889 Bellaire Blvd Ste 118, Houston TX 77036

聯禾地產凱蒂亞洲城

電話：346-998-8000

地址：23119 Colonial Parkway A1, Katy TX 77449

- 1.房屋销售(Property Sale)

房屋销售可分为「成屋销售(Existing Home Sales)」，占全部的84%，和16%的「新屋销售」。房屋销售数据增加，代表房地产景气持续成长。反之房屋销售数据持续下降代表房地产市场景气衰退。

通常投资者做购房决策时，会仔细考虑自身经济状况，因此房屋销售指标通常也能作为总体经济活动重要参考讯号。若房屋销售不断增长，代表消费者预期景气会上升愿意将钱投资在房地产。。
- 2.房屋开工率(Housing Start)

房屋开工率代表每个月私有住宅或公寓动工数量。由于开工前须取得营业许可后才能建设,营业许可率通常能用来预测未来开工水平。通常房屋开工率持续下降，代表经济不景气可能陷入衰退。

房地产市场越热络促使开工率上升，由于独栋房屋占房屋开工比重约七成，因此独栋房屋的成交、库存等数据也作为房产供需判断重要参考指标。一般来说房屋开工率和联邦基准利率呈反向关系,利率上升购买意愿降低；利率下降购买意愿上升。
- 3.房贷利率

一般来说，房屋贷款利率越低，民众购屋意愿越高；反之房贷利率高代表购屋成本高，消费者房屋需求越低。房贷利率上升影响房价涨幅变小，因为贷款利率变高。对买家来说贷款每个月还款金额也会变高。

- 建议投资者前要和贷款机构和房地产经纪人确认，就目前房贷利率情况来看，最高您的购买力可以买到怎么样的房子，以及了解每月还款金额是多少，衡量自身是否能顺利贷到款，务必先确认自身经济条件能够负担，再进行购屋谈判。
- 4.市场房屋库存(Housing Inventory)

市场房屋库存类似存货的概念，通过观察市场房源库存量，了解目前房地产市场情况。当房源库存量越小，代表待售出的房子较少，市场供给小于需求。反之，当房源库存量越大，供过于求则属于买家市场。

可以将市场房屋库存/每月销售量来计算，得出的结果为市场去库存所需消化的时间。得出的数据约低，代表消化速度越快，可知市场需求旺盛。一般来说，数据在4个月以下属于卖家市场，而数据在4-6个月属于中立市场，买卖双方供需平衡，数据在6个月以上则属于买家市场。
- 5.房屋售价中位数价格/平均价格

将中位数或平均价格和上一年度相比，能够了解房价涨跌，以及是否有通膨或紧缩情况。与去年相比，目前美国房地产市场的房源短缺，今年房屋销售数据涨幅31.5%，且美国南部区域(包含德州)的成屋售价中位数，呈现增长趋势。虽然贷款利率上扬，整体房市还是相当热络。

可靠的房地产经纪人能提供专业及更详细的分析数据，比如将上述指标锁定休斯顿特定区域，协助您全盘掌握该区域市场行情。
